

Prohædium in Organo pleno spectabile di Joh: Seb: Bach

This image shows a handwritten musical score for a prelude in organ. The score is written on ten systems of two staves each. The notation is dense and characteristic of the Baroque era, featuring complex rhythmic patterns, including many sixteenth and thirty-second notes, and various rests. The handwriting is in dark ink on aged paper. The title at the top reads 'Prohædium in Organo pleno spectabile di Joh: Seb: Bach'. The score begins with a treble clef and a common time signature (C). The music is highly technical and expressive, typical of Bach's organ works.

Neuroplasticity Moheb Costandi, 2016-08-16 The real story of how our brains and nervous systems change throughout our lifetimes, with or without brain training. Fifty years ago, neuroscientists thought that a mature brain was fixed like a fly in amber, unable to change. Today, we know that our brains and nervous systems change throughout our lifetimes. This concept of neuroplasticity has captured the imagination of

a public eager for self improvement and has inspired countless Internet entrepreneurs who peddle dubious brain training games and apps In this book Moheb Costandi offers a concise and engaging overview of neuroplasticity for the general reader describing how our brains change continuously in response to our actions and experiences Costandi discusses key experimental findings and describes how our thinking about the brain has evolved over time He explains how the brain changes during development and the synaptic pruning that takes place before brain maturity He shows that adult brains can grow new cells citing among many other studies research showing that sexually mature male canaries learn a new song every year He describes the kind of brain training that can bring about improvement in brain function It s not gadgets and games that promise to rewire your brain but such sustained cognitive tasks as learning a musical instrument or a new language Costandi also notes that London cabbies increase their gray matter after rigorous training in their city s complicated streets He tells how brains compensate after stroke or injury describes addiction and pain as maladaptive forms of neuroplasticity and considers brain changes that accompany childhood adolescence parenthood and aging Each of our brains is custom built Neuroplasticity is at the heart of what makes us human
