*The Chinese Idea of a University* Rui Yang, 2022-09-02 In *The Chinese Idea of a University* Phoenix Reborn Rui Yang conceptualizes the cultural foundations of modern university development in Chinese societies Instead of focusing on the uniqueness of the societies this book aims to prove that one educational purpose could be fulfilled via many paths and that most of the characteristics the university could be found in other institutions of higher learning Citing the practices of four selected Chinese societies Yang opposes the existence of an impassable chasm between Chinese and Western ideas of a university and argues that it is possible to combine Chinese and Western ideas of a university Also this book is one of the first in English to theorize the Chinese idea of a university It links the historical events to the present in a context of an enormous impact of Western academic models and institutions from the beginning of modern universities in Chinese societies to the contemporary period The scholarship is of high quality based on a thorough critical reading of relevant literature in both English and Chinese as well as detailed empirical research carried out on the campuses of eight leading universities in the four Chinese societies under consideration Ruth Hayhoe professor University of Toronto Yang Rui has produced an academic masterwork China has arrived as a global power and the East Asian university has achieved or largely achieved the long project of catch up to the West The future begins now and question of the Chinese idea of a university should trigger much discussion Professor Yang favors the development of hybrid East West higher education in the Chinese civilizational zone noting that to an extent existing universities have taken this path already He develops these challenging issues with a depth of scholarship far exceeding the current journal papers in the topic area and a style of exposition that reads really well A book of lasting importance Highly recommended Simon Marginson professor University of Oxford joint editor in chief **Higher Education** ,1898 **The Current Literature** ,1898 **The Smith College Monthly** ,1912 *From Idea to Institution* Herbert T. Hoover, 1989 **Highway Topics** ,1924 **Moderator-topics** ,1920 *Psychological Monographs* ,1903 Includes music **Pamphlets and Reprints** Esson McDowell Gale, 1911 **The Mennonite** ,1923 *The Transnational Politics of Higher Education* Meng-Hsuan Chou, Isaac Kamola, Tamson Pietsch, 2016-02-26 This edited volume introduces readers to the relationship between higher education and

transnational politics It shows how higher education is a significant arena for regional and international transformation as well as domestic political struggle replete with unequal power relations This volume shows The causes and impacts of recent transformations in higher education within a transnational context Emerging similarities in objectives institutional set ups and approaches taking place within higher education institutions across different world regions The asymmetrical relations between various kinds of institutional commercial and state actors across borders The extent to which historical and colonial legacies are important in the transformation of higher education The potential effects these developments have on the current structure of international political order Drawing on case studies from across the Middle East Asia Africa Latin America and Europe the contributors develop diverse perspectives explaining the impact of transnational politics on higher education and higher education on transitional politics across time and locality This book is among the first multi disciplinary effort to wrestle with the question of how we can understand the political role of higher education and the political force universities exert in the realm of international relations
