Serious Fun  Samantha Hardingham,2022-11-07 Guest edited by Samantha Hardingham This issue of AD celebrates the extraordinary life and work of British architect Will Alsop 1947 2018 a career and portfolio that is both literally and metaphorically steeped in colour Characterised as a maverickarchitect Alsop was in truth an individualist who was all for the collective and a non conformist His design aim was to replace a little misery in the world with a little joy and delight Far from diminutive in ambition many of his built projects caused big shifts in thinking about ways for citizens to perceive occupy and enjoy their cities He believed deeply in the active participation of clients to explore their architectural ideas involving them in workshops and the making of films to help them to see and better understand what design could positively do for them His buildings and artworks are as contentious as they have been highly acclaimed but never fail to amaze and inspire His continuous engagement in teaching lecturing and exhibiting throughout his career with academic posts held in the UK Germany Austria Australia and the US meant he always remained in touch and was a consistent source of encouragement to new generations of architects entering the profession This AD aims to harness that creative energy commitment and camaraderie Contributors Ollie Alsop Thomas Aquilina Nigel Coates Peter Cook Paul Finch Mark Garcia

**Housing as Intervention** Karen Kubey, 2018-08-28 Across the world the housing crisis is escalating Mass migration to cities has led to rapid urbanisation on an unprecedented scale while the withdrawal of public funding from social housing provision in Western countries and widening income inequality have further compounded the situation In prosperous US and European cities middle and low income residents are being pushed out of housing markets increasingly dominated by luxury investors The average London tenant for example now pays an unaffordable 49 per cent of his or her pre tax income in rent Parts of the developing world and areas of forced migration are experiencing insufficient affordable housing stock coupled with rapidly shifting ways of life In response to this context forward thinking architects are taking the lead with a collaborative approach By partnering with allied fields working with residents developing new forms of housing and leveraging new funding systems and policies they are providing strategic leadership for what many consider to be our cities most pressing crisis Amidst growing economic and health disparities this issue of AD asks how housing projects and the design processes behind them might be interventions towards greater social equity and how collaborative work in housing might reposition the architectural profession at large Recommended by Fast Company as one of the best reads of 2018 and included in their list of 9 books designers should read in 2019 Contributors include Cynthia Barton Deborah Gans and Rosamund Palmer Neeraj Bhatia and Antje Steinmuller Dana Cuff Fatou Dieye Robert Fishman Na Fu Paul Karakusevic Kaja Khl and Julie Behrens Matthew Gordon Lasner Meir Lobaton Corona Marc Norman Julia Park Brian Phillips and Deb Katz Pollyanna Rhee Emily Schmidt and Rosalie Genevro Featured architects Architects for Social Housing Shigeru Ban Architects Tatiana Bilbao ESTUDIO cityLAB Fr d ric Druot Architecture ERA Architects GANS studio Garrison Architects HOWOGE

**Impact** Ali Rahim, Hina Jamelle, 2020-12-02 This issue of AD explores the working discipline of architecture as it impacts the material culture within which it is always embedded An architecture of impact uses advanced digital techniques in such a way that its material assembly supersedes its use of the digital Until now this type of architecture has been formally and materially bound by restrictive conventional methodologies which the digital project has moved from the scale of installations to three dimensional building sized fabrications Unless architects turn to a new culture of making architecture shaped by even innovative digital technology will become irrelevant Architectural projects that are more subversive in how they are created and that lose their digital signature have greater potential to be at the forefront of the discipline's new materialisations This issue illustrates these ideas and their architectural impact

**Re-Imagining the Avant-Garde** Matthew Butcher, Luke C. Pearson, 2019-08-05 The 1960s and 1970s avant garde has been likened to an architectural Big Bang such was the intensity of energy and ambition in which it exploded into the postwar world Marked out by architectural projects that redefined the discipline it remains just as influential today References to the likes of Archizoom Peter Eisenman John Hejduk and Superstudio abound Highly diverse the avant garde cannot be defined as a single strand or tendency It was divergent geographically reaching from Europe to North America and Japan and in its political formal and cultural preoccupations It was unified though as a critical and experimental force critiquing contemporary society against the backdrop of extreme social and political upheaval the Paris riots of May 1968 the anti Vietnam war movement in America and the looming ecological crisis Re imagining the Avant garde outlines how in contemporary architectural practice avant garde projects retain their power as historical precedents as barometers of a particular design ethos as critiques of society and instigators of new formal techniques Given the far reaching impact of the subsequent digital revolution which has since reshaped every aspect of practice the issue asks why this historical period continues to retain its undeniable grip on current architecture
