Risk Management Handbook Federal Aviation Administration,2012-07-03 Every day in the United States over two million men women and children step onto an aircraft and place their lives in the hands of strangers As anyone who has ever flown knows modern flight offers unparalleled advantages in travel and freedom but it also comes with grave responsibility and risk For the first time in its history the Federal Aviation Administration has put together a set of easy to understand guidelines and principles that will help pilots of any skill level minimize risk and maximize safety while in the air The Risk Management Handbook offers full color diagrams and illustrations to help students and pilots visualize the science of flight while providing straightforward information on decision making and the risk management process

[US Forest Service Fire and Aviation Management: Aviation Safety Management System Guide](#) Department Agriculture,Forest Service,2012-11-06 A Safety Management System SMS is essentially a quality management approach to controlling risk It provides the organizational framework to construct and support a sound safety culture that actively controls its risk exposure With increased aviation activity and decreased resources the SMS pushes the limits of current safety strategies and practices by developing and implementing a structured management system to control risk and meet legal responsibilities in aviation operations Our goal is to develop a safety culture that achieves and maintains a zero accident rate A highly successful safety culture understands that every person in the organization accepts that safety is a conscious and ongoing mindset as opposed to simply a box to be checked We understand that safety is a dynamic non event Consequently we need to maintain the capability to continuously seek out and eliminate latent defects within our systems and culture By being proactive in this area we eliminate potential causal factors

that could lead to future accidents The purpose of this guide is to assist in fulfilling the requirements of FSM 5700 and the National Aviation Safety and Management Plan with respect to the implementation of Safety Management Systems SMS This guide provides best practices for the application of SMS in the Forest Service and for its service providers The SMS shall comprehensively examine the functions of the Forest Service and the operational environment to identify hazards and to analyze associated risks The specific functional components include Safety management Organization and personnel Training and proficiency Flight operations International operations when applicable Aircraft equipment requirements Aircraft maintenance Operations policies and procedures Emergency accident incident response Environmental management Occupational health and safety and Security This document provides guidance for SMS development applicable to all Forest Service aviation operations Statements containing the words must shall and will are directive in nature and the corresponding policy can be found in the FSM 5700 This Guide contains best practices for Safety Management Systems in the aviation program thus the terms may and should indicate the best practice or an industry standard that allows some discretion in its execution
