Awakenings Oliver Sacks:

Awakenings Oliver Sacks, 1986-03-19 This is an extraordinary account of a group of 20 patients survivors of the great sleeping sickness epidemic which swept the world in the 1920s and the astonishing explosive awakening effect they experienced 40 years later through a new drug L DOPA administered by Dr Sacks The stories he tells of these remarkable individuals are moving often courageous and sometimes tragic Now hailed as a medical classic *Awakenings* was first published in 1973 and won the Hawthornden Prize of that year It has since inspired a TV documentary radio and stage plays and a major feature film For this revised edition the author has written much new material including a section about *Awakenings* on stage and screen Awakenings [By] Oliver Sacks Oliver W. Sacks, 1973 **Awakenings** Oliver W. Sacks, 1990-01-01 *Awakenings* which inspired the major motion picture is the remarkable story of a group of patients who contracted sleeping sickness during the great epidemic just after World War I Frozen for decades in a trance like state these men and women were given up as hopeless until 1969 when Dr Oliver Sacks gave them the then new drug L DOPA which had an astonishing explosive awakening effect Dr Sacks recounts the moving case histories of his patients their lives and the extraordinary transformations which went with their reintroduction to a changed world Book jacket **Neuroscience and Art** Amy Ione, 2024-08-27 This book is focused on how understanding ourselves as humans is incomplete without considering both biological and cultural aspects Using the neurocultural perspective the book explores how everything in the world is filtered back and forth through the brain and culture The thrust of the book therefore is to explore the power of art in creating a bridge between cultural and neuroscientific lines of inquiry Looking at both clinical and non clinical populations the text examines historical foundations distinguishes congenital developmental conditions from those that are acquired and emphasizes how the brain constructs our sensory experiences Several distinctive features separate this research from other publications First the book opens with a review of how the historical literature is still etched into the ideas we employ to explain elements across the interdisciplinary fields of art aesthetics our sensory experience psychology cognition and well being Second the research adopts a humanistic rather than a philosophical or social science perspective in demonstrating the value of coupling anatomy and physiology with the natural and social environment In this artists from all genres are incorporated Among them are Iris Murdoch Ludwig van Beethoven Leonardo da Vinci Cristoforo de Predis Rembrandt Federico Fellini Chuck Close and David Hockney Case studies demonstrate how neuroscientific research meshes with art individual and cultural variables in ways that range from health and well being to physiological decline and biological traumas These include a case study that examines how Oliver Sacks combined biology and biography in his writings It also explores art projects in several genres inspired by his studies Another case study is on the role of film as a useful clinical tool Here the book also demonstrates that cinematic devices used by filmmakers intersect with perceptual and cognitive neuroscience A defining feature of the analysis is the integration of research on brain injuries with humanistic responses in

film literature and the visual arts This section outlines the lack of consensus regarding the causes and treatment of shell shock in World War I before introducing how research and art now work with PTSD TBI Finally the book examines therapeutic cases of professional and non professional artists concluding with a discussion of synesthesia and the senses

Clinical Ethics on Film M. Sara Rosenthal, 2018-06-08 This book discusses feature films that enrich our understanding of doctor patient dilemmas The book comprises general clinical ethics themes and principles and is written in accessible language Each theme is discussed and illuminated in chapters devoted to a particular film Chapters start with a discussion of the film itself which shares details behind the making of the film box office and critical reception casting and other facts about production The chapter then situates the film in a history of medicine and medical sociology context before it delves into the clinical ethics issues in the film and how to use it as a teaching aid for clinical ethics Readers will understand how each film in this collection served to bring particular clinical ethics issues to the public's attention or reflected medico legal issues that were part of the public discourse The book is a perfect instructor's guide for anyone teaching bioethics healthcare ethics medical sociology medical history healthcare systems narrative medicine or nursing ethics *New York Magazine*, 1990-12-17 *New York Magazine* was born in 1968 after a run as an insert of the *New York Herald Tribune* and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Chip Kidd** Véronique Vienne, 2003 Chip Kidd is best known for his book jacket designs which have been credited with spawning a revolution in the art of the book cover in the US Master of the graphic non sequitur Kidd has designed covers for books by authors such as John Updike Dean Koontz Michael Crichton Peter Carey and William Boyd that engage the reader's intelligence as well as imagination This illustrated volume presents an appraisal of his oeuvre *A Leg to Stand On* Oliver Sacks, Oliver W.
