Strange Constellations Russell Blackford,Sean McMullen,1999-05-30 Australia has long been thought of by Europeans as an exotic and mysterious land During the nineteenth century it was envisioned much as the moon and Mars are today a distant and uncharted place with hidden possibilities for explorations and adventures The continent captured the imagination of European writers in the 1800s and with its settlement Australia became the setting for tales of lost worlds and ancient civilizations Australia has since developed a rich national literature and perhaps because of its novelty and wilderness it has inspired numerous science fiction writers This book provides a critical survey of the history of Australian science fiction from its nineteenth century origins to the present The volume proceeds chronologically with an introductory section on the origins of Australian science fiction before 1925 It then turns to the rise of traditional science fiction in Australia from 1926 to 1959 with discussions of such writers as James Morgan Walsh Norma Hemming and Wynne Whiteford A section on the period from 1960 to 1974 examines the growing national recognition given to such Australian science fiction writers as David Rome and Jack Wodhams while a section on science fiction between 1975 and 1984 reviews the rise of small presses and the growth of literary criticism of the genre in Australia A final section addresses the maturation of Australian science fiction from 1985 to 1998 with attention to Aussiecon Two Extensive bibliographic information concludes the volume

Science Fiction & Fantasy Book Review Annual, 1991 **The Best of Greg Egan** Greg Egan, 2019 Greg Egan is arguably Australia's greatest living science fiction writer. In a career spanning more than thirty years, he has produced a steady stream of novels and stories that address a wide range of scientific and philosophical concerns: artificial intelligence, higher mathematics, science vs. religion, the nature of consciousness, and the impact of technology on the human personality. All these ideas and more find their way into this generous and illuminating collection, the clear product of a man who is both a master storyteller and a rigorous exploratory thinker. *The Best of Greg Egan* contains twenty stories and novellas arranged in chronological order, and each of them is a brilliantly conceived, painstakingly developed gem. The book opens with *Learning to be Me*, about a society in which the organic human brain can be replaced by a miraculous piece of technology called the jewel, a mock brain that confers among other things a kind of immortality on its recipients. *Bit Players*, the opening movement in a trio of tales that continues with *3 adica* and *Instantiation*, posits a world in which cheaply generated software beings are exploited for the basest commercial purposes. Other sets of interconnected stories, all of them reprinted here, include the mathematically themed *Luminous* and *Dark Integers* and a pair of stories centered on the complex marriage of a physicist and a mathematician. *Singleton* and *Oracle*. *Reasons to be Cheerful* concerns a young boy whose brain tumor has an unexpected effect on his life, moods, and view of the world. *Axiomatic* tells the story of a society in which implants can be used to alter the human personality with potentially lethal results. And the Hugo Award-winning novella *Oceanic* is a powerful account of a boy whose deeply held religious beliefs are undermined by what he comes to learn about the laws of the physical world. This book really does represent the best of Greg Egan. **Transrealist Fiction** Damien Broderick, 2000-06-30 Transrealist writing treats immediate perceptions in a fantastic way according to science fiction writer and mathematician Rudy Rucker, who originated the term. In the expanded sense argued in this book, it also intensifies imaginative fiction by writing the fantastic from the standpoint of richly personalized experience. Transrealism is also related to slipstream writing, another category introduced into studies of speculative fiction to account for texts that seem to follow trajectories mapped by the huge body of science fiction accumulated in the last century while retaining a central interest in traditional literary strategies. This book examines a variety of work from the transrealist perspective, something that has not been done previously. It emphasizes the texts of Philip K. Dick and Rucker himself, while it additionally engages the texts of such slipstream writers as Kurt Vonnegut, J. G. Ballard, and John Barth. It places its argument against the antihumanist trend in science fiction and builds comparisons with more traditional varieties of science fiction works. **Projections** Lou Anders, 2004 Examines the history and people, the science and the society, the lives, times, and themes, the cultural impact, and the critical response of the dynamic genre that is speculative fiction. **American Book Publishing Record**, 1998 **Soundings** Gary K. Wolfe, 2005 A collection of reviews by Gary Wolfe originally published in the British monthly magazine *Locus* from 1992-1996. Autographed by the author. *Science Fiction, Fantasy & Horror*, 1991 A comprehensive
