and implement deep learning models for mobile devicesLeverage the distributed capabilities of Caffe2 to build models that  
scale easilyBook Description Caffe2 is a popular deep learning library used for fast and scalable training and inference of  
deep learning models on various platforms This book introduces you to the Caffe2 framework and shows how you can  
leverage its power to build train and deploy efficient neural network models at scale It will cover the topics of installing  
Caffe2 composing networks using its operators training models and deploying models to different architectures It will also  
show how to import models from Caffe and from other frameworks using the ONNX interchange format It covers the topic of  
deep learning accelerators such as CPU and GPU and shows how to deploy Caffe2 models for inference on accelerators using  
inference engines Caffe2 is built for deployment to a diverse set of hardware using containers on the cloud and resource  
constrained hardware such as Raspberry Pi which will be demonstrated By the end of this book you will be able to not only  
compose and train popular neural network models with Caffe2 but also be able to deploy them on accelerators to the cloud
