*Tolerance and Risk* Mitra Rastegar,2021-09-07 How apparently positive representations of Muslims in U S media cast Muslims as a racial population Portrayals of Muslims as the beneficiaries of

liberal values have contributed to the racialization of Muslims as a risky population since the September 11 attacks. These discourses which hold up some Muslims as worthy of tolerance or sympathy reinforce an unstable good Muslim/bad Muslim binary where any Muslim might be moved from one side to the other. In *Tolerance and Risk* Mitra Rastegar explores these discourses as a component of the racialization of Muslims where Muslims are portrayed as a highly diverse population that nevertheless is seen to contain within it a threat that requires constant vigilance. *Tolerance and Risk* brings together several case studies to examine the interrelation of representations of Muslims abroad and in the United States. These include human interest stories and opinion polls of Muslim Americans, media representations of education activist Malala Yousafzai, LGBTQ activist discourses, local New York controversies surrounding Muslim-led public projects, and social media discourses of the Syrian refugee crisis. *Tolerance and Risk* demonstrates how representations of tolerable or sympathetic Muslims produce them as a population with distinct characteristics, capacities, and risks, and circulate standards by which the trustworthiness or threat of individual Muslims must be assessed. *Tolerance and Risk* examines the ways that discourses of liberal rights, including feminist and LGBTQ rights discourses, are mobilized to racialize Muslims as uncivilized even as they garner sympathy and identification with some Muslims.

**State** Alexandra S. Moore, Samantha Pinto, 2020-03-14 This book investigates the imaginative capacities of literature art and culture as sites for reimagining human rights addressing deep historical and structural forms of belonging and unbelonging the rise of xenophobia neoliberal governance and securitization that result in the purposeful precaritization of marginalized populations ecological damage that threatens us all yet the burdens of which are distributed unequally and the possibility of decolonial and posthuman approaches to rights discourses The book starts from the premise that there are deep seated limits to the political possibilities of state and individual sovereignty in terms of protecting human rights around the world The essays explore how different forms materials perspectives and aesthetics can help reveal the limits of normative human rights and contribute to the cultural production of new human rights imaginaries beyond the borders of state and self

Radio for the Millions Isabel Huacuja Alonso, 2023-01-03 Co winner 2023 AIPS Book Prize American Institute of Pakistan Studies Finalist 2023 Richard Wall Memorial Award Theatre Library Association From news about World War II to the broadcasting of music from popular movies radio played a crucial role in an increasingly divided South Asia for more than half a century Radio for the Millions examines the history of Hindi Urdu radio during the height of its popularity from the 1930s to the 1980s showing how it created transnational communities of listeners Isabel Huacuja Alonso argues that despite British Indian and Pakistani politicians efforts to usurp the medium for state purposes radio largely escaped their grasp She demonstrates that the medium enabled listeners and broadcasters to resist the cultural linguistic and political agendas of the British colonial administration and the subsequent independent Indian and Pakistani governments Rather than being merely a tool of nation building in South Asia radio created affective links that defied state agendas policies and borders It forged an enduring transnational soundscape even after the 1947 Partition had made a united India a political impossibility Huacuja Alonso traces how people engaged with radio across news music and drama broadcasts arguing for a more expansive definition of what it means to listen She develops the concept of radio resonance to understand how radio relied on circuits of

oral communication such as rumor and gossip and to account for the affective bonds this talk created By analyzing Hindi film song radio programs she demonstrates how radio spurred new ways of listening to cinema Drawing on a rich collection of sources including newly recovered recordings listeners letters to radio stations original interviews with broadcasters and archival documents from across three continents Radio for the Millions rethinks assumptions about how the medium connects with audiences

**Our Biggest Fight** Frank H. McCourt, Jr., 2024-03-12 NATIONAL BESTSELLER The internet as we know it is broken Here's how we can seize back control of our lives from the corporate algorithms and create a better internet before it's too late In the spirit of Thomas Paine's Revolution era Common Sense this manifesto challenges us to create new digital architectures to safeguard democracy Walter Isaacson 1 New York Times bestselling author of Elon Musk It was once a utopian dream But today's internet despite its conveniences and connectivity is the primary cause of a pervasive unease that has taken hold in the U S and other democratic societies It's why youth suicide rates are rising why politics has become toxic and why our most important institutions are faltering Information is the lifeblood of any society and our current system for distributing it is corrupted at its heart Everything comes down to our ability to communicate openly and trustfully with each other But thanks to the dominant digital platforms and the ways they distort human behavior we have lost that ability while at the same time we've been robbed of the data that is rightfully ours The roots of this crisis argue Frank McCourt and Michael Casey lie in the prevailing order of the internet In plain but forceful language the authors a civic entrepreneur and an acclaimed journalist show how a centralized system controlled by a small group of for profit entities has set this catastrophe in motion and eroded our personhood And then they describe a groundbreaking solution to reclaim it rather than superficial patchwork regulations we must reimagine the very architecture of the internet The resulting third generation internet would replace the status quo with a new model marked by digital property rights autonomy and ownership Inspired by historical calls to action like Thomas Paine's Common Sense Our Biggest Fight argues that we must act now to embed the core values of a free democratic society in the internet of tomorrow
