The volume draws on different disciplines in the social sciences and humanities, including science and technology studies, critical data studies, communication and media studies, and cultural studies, as well as philosophy and political science, to offer a range of complementary perspectives. The essays combine conceptual reflection, as well as empirical engagement, with the topic of metaverse datafication and its political, infrastructural, and social implications. Key focal points include analysis of the corporate narratives that drive the current development of metaverse platforms and technologies, the computational infrastructures and material resources that enable metaverse technologies, the reconfiguration or even subversion of state power, global markets, and regulatory frameworks, the impact of metaverse practices and data on social life and personal identity, and the role that these developments play for academic research and our conceptualisation of knowledge.
