*Music and Knowledge: A Performer's Perspective* Per Dahl, 2019-02-18 FREELY AVAILABLE ONLINE AS OPEN ACCESS BOOK This book illustrates the acquisition of knowledge in a musician's performative practice and how this can contribute to the development of Artistic Research Using a broad understanding of knowledge the first part of the book presents aspects of the practitioner knowledge a musician develops through daily exercises and performances Technical and practical skills creativity and music reading are central topics Part

It describes four different methodologies of knowledge accumulation. First is the hypothetico-deductive method, music as object. Then the author asks, "Where is the musical work?" After an introduction to semiotics, the question that must follow is, "Is music a language?" Following up methodologies focusing on intersubjective and contextual topics, the presentation of hermeneutics generates the question, "What happens to the music when you are listening?" Being the most subjective phenomenology is the last methodology to be presented. The question it poses is, "Are analysis and interpretation two sides of the same coin?" Artistic research is a new perspective in knowledge acquisition and the performing artist is the pivot point. The obvious insight positioning music beyond the score is elaborated into a critique of the representational theory as a relevant ontological discourse in music. As an alternative, the potential in embodied meaning theories is discussed through cognitive linguistic and artistic approaches. Artistic expressions convey the subjective practitioner knowledge based on the difference between the objective sign and the intersubjective expression. This makes music as communication the ultimate topic. In conclusion, understanding the meaning construction and the conditions of artistic content are both of importance in artistic research.

Regulating Human Rights, Social Security, and Socio-Economic Structures in a Global Perspective Alaverdov, Emilia, Bari, Muhammad Waseem, 2022-06-24. The social security of a person in the modern world can only be ensured by a purposeful policy and actions of the state and society aimed at achieving it. This requires favorable socio-economic conditions and creating an effective personal security system protecting property and citizens. Human social security can be threatened by phenomena and processes that lead to drastic changes in the life of society and dangerous deformations that entail severe social consequences for the individual social groups and institutions. Regulating Human Rights, Social Security, and Socio-Economic Structures in a Global Perspective discusses the global regulation of human rights, social security, and socio-economic structures in an era of acute challenges and crises. It presents comprehensive research on political structures and the conflicts within causing challenges to individual identity and insecurity. Covering topics such as legal socio studies, digital authoritarianism, and regional security, this premier reference source is an essential resource for government officials, politicians, geopolitical experts, economists, non-profit organizations, human rights advocates, libraries, students, researchers, and academicians.
