The Architecture Student's Handbook of Professional Practice opens the door to the vast body of knowledge required to effectively manage architectural projects and practice. A professional architect is responsible for much more than design; this book is specifically designed to help prepare you for the business and administrative challenges of working in the real world, whether you are a student or are just starting out in practice. It provides clear insight into the legal, financial, marketing, management, and administrative tasks and issues that are integral to keeping a firm running. This new edition has been restructured to be a companion textbook for students undertaking architectural practice classes, while also fulfilling the specific knowledge needs of interns and emerging professionals. It supplements information from the professional handbook with new content aimed at those setting out in the architectural profession and starting to navigate their careers. New topics covered in this new edition include: path to licensure, firm identity, professional development, strategic planning, and integrated project delivery. Whether you want to work at a top firm, strike out on your own, or start the next up-and-coming team, the business of architecture is a critical factor in your success. This book brings the fundamentals together to give you a one-stop resource for learning the reality of architectural practice. Learn the architect's legal and ethical responsibilities. Understand the processes of starting and running your own firm. Develop, manage, and deliver projects on time and on budget. Become familiar with standard industry agreements and contracts. The Architecture Student's Handbook of Professional Practice provides access to the nuts and bolts that keep a firm alive, stable, and financially sound.

Rethinking the Crit Patrick Flynn, Maureen O'Connor, Mark Price, Miriam Dunn, 2022-09-06 Assessment in architecture and creative arts schools has traditionally adopted a one-size-fits-all approach by using the crit, where students pin up their work, make a presentation, and receive verbal feedback in front of peers and academic staff. In addition to increasing stress

and inhibiting learning which may impact more depending on gender and ethnicity the adversarial structure of the crit reinforces power imbalances and thereby ultimately contributes to the reproduction of dominant cultural paradigms This book critically examines the pedagogical theory underlying this approach discusses recent critiques of this approach and the reality of the crit is examined through analysis of practice The book explores the challenges for education and describes how changes to feedback in education can shape the future of architecture and the creative arts
