

Founder of the European Ropes Course Industry

## **EUROPEAN ROPES COURSE STANDARD EN: 15567 (Part 1 Construction and Part 2 Operation)**

You may well have heard a great deal about this standard which has been many years in the making. The standard is now "complete" and the finished version should be available to buy from the British Standards Institute. It comes into effect in March 2008.

In summary the process was instigated by the French and Germans; however, in order to have some influence on the outcome, a number of British experts became actively involved in this (immensely bureaucratic) process which involved contributions from 26 countries across the European Union.

There are thousands of European Standards; however, this is the first time that a European Standard has endeavoured to address operational issues. Not surprisingly this was also the most contentious part of the process!

Nick Moriarty (Managing Director of RCD) was elected co-convenor of EN: 15567 and therefore has first hand knowledge of all that it entails. Nick will be making a presentation on the significant aspects of the standard and how it is likely to affect both operators and constructors in the United Kingdom. He will be available to answer any questions people may have about the standard and how it may or may not affect your organisation.

On balance the European Standard is very good news for the ropes course industry. There are implications for operators; however, the greatest impact will be on manufacturers to build ropes courses to acceptable standards and to provide considerable amounts of documentation to their clients. Conformity to the standard is not a legal requirement, in practice however it is the first point of reference used by enforcement bodies and the courts in the event of an accident. It is therefore significant and its requirements need to be taken seriously.
