in storage and is also used to improve security here N represent the number of clouds we are using Low means the file is divided into N blocks here 3 and each block is stored in N different location of the single cloud Medium means the file is divided into N blocks and each block is stored in N different clouds which improves the security of data but reduce the availability High means the file is divided into N blocks and each N block is stored in N different clouds that are we are keeping the replicas of file in N different clouds The system maintains a download count to dynamically create the replicas in accordance with the users demand
