Aqa English Past Papers:

Teaching English for the Real World Joe Nutt, 2020-05-15 So much of the teaching in schools of how the English works does not prepare students for the real world So little has changed in exams the curriculum or the way people think about English teaching in several decades This book is Joe Nutt s attempt to help schools redress that dramatic imbalance It is not in any sense a practical teaching guide only for English teachers nor is it full of hints and tips lesson plans and schemes of work Teaching English for the Real World is a far wider consideration of what schools and English teachers should be doing if they wish to prepare secondary school children to be successful and effective users of English in the real world of work higher education and adult life they will all too soon enter If you are an English teacher by the time you finish reading Teaching English for the Real World you should be better prepared to deliver lessons that those you teach will forever be grateful for The book consists of four main sections English in context towards the GCSE choosing texts and technology matters It starts by putting English clearly into context through a range of current examples It urges teachers to consider the complex role English usage plays on everything from the side of a bus through tissue thin social media garish slideshows and perky TED talks to the hundreds of pages of research or official reports so often used as the basis for serious political policy and commercial decision making It will then examine the classroom status quo and instead of the unrealistic and damaging focus on experiment and creativity instead of requiring them to write newspaper articles stories or speeches the main deliverables in any English GCSE exam the book will argue that teachers should think carefully about how to connect what children write with who they are and where they really want to publish The next section deals with choices of texts There is a place for children to be taught to write well by example but there are challenging questions to ask about much of the material routinely chosen How often are texts and authors selected for study for reasons that have absolutely nothing whatsoever to do with knowledge or linguistic skill and everything to do with politics Even exam boards are guilty of this The final section examines the relationship between English and the technology real people use to produce it It reflects on how technology has impacted on the quality of the reading experience itself and argue that there is a crisis in reading in secondary schools with many children sailing through exams yet leaving school as disinterested and even poor readers And it suggests how teachers might approach introducing these different risks to children and equip them best to make sound judgements about the way they write and communicate for personal and employment purposes in adult life [The Complete Guide to Becoming an English Teacher](#) Jo Westbrook, 2009-12-01 Praise for the previous edition This is a text that should accompany every student teacher of English and find its way on to the shelf of all practising teachers This book excited me It is written in a style that makes you want to try out activities and take up challenges This book will encourage the student teacher to embrace the subject of English along with its associated values and debates ESCalate If I was training to teach English today this is the book I would want an extraordinarily professional handbook of good practice Geoff Barton Times
