

W552W

Wiring System Classifications - Deciphering the WS Code

When a cable type is assigned a wiring system code it means that a cable, representative of its group as defined by AS/NZS 3013, has satisfied the test criteria for that rating.

In order to understand what a WS rating means, reference to section 3 of AS/NZS 3013 is recommended, however the table below gives a brief overview of how the WS ratings relate to the electrical and mechanical performance of the rated cables and elements in both normal service and fire conditions.

WS (wiring system)	1st Numeral (Electrical) Performance		2nd Numeral (mechanical) Performance		Supplementary Letter
	Number	Level of circuit integrity in fire conditions	Number	Level of impact protection	Water Spray Test
	1	30-min	1	Light / 3 Joules	"W"
	2	60-min	2	Moderate / 10 Joules	
	3	90-min	3	Heavy / 30 Joules	
	4	120-min	4	Very Heavy / 500 Joules	
	5	120-min	5	Extremely Heavy / 5000 Joules	

As an example a W552W cable cable will have the following characteristics:

- WS – is suitable for inclusion in a wiring system
- 5 – has electrical performance (circuit integrity) for 120 minutes (two hours) in a fire condition
- 2 – provides a moderate level of protection against impact damage during normal service
- W – has electrical performance (circuit integrity) following exposure to water from overhead sprinklers

Generally the level of mechanical performance (2nd numeral offered by suppliers) involved are electrical cables &2 (Moderate impact). The level of compliance can be met by most Australian fire rated power and control cables using standard construction parameters from the relevant local standards. This mechanical performance rating can be improved to WS 42 which provides a level of medium impact against damage from vehicles such as cars and light commercial vehicles by:

- addition of 1 (low speed steel plate coverage with a maximum unobstructed gap of 10mm)
- enhanced material type to 42/2's
