**Challenges, Opportunities & Outcomes of Patient-Oriented Research in Learning Health Systems** Tracy Wasylak, Kiran Manhas, Karen M. Benzies , Maria Jose Santana, 2026-03-17 Patient oriented research engages patients families communities and or the public in the scientific process Patient oriented research has many synonyms including patient and public involvement community science citizen science peer research and patient led research Learning health systems LHSs mobilize data incentives science and culture towards the collaborative goal of continuous improvement and innovation LHS institutionalizes evidence based decision making by prioritizing research and quality improvement alongside integrated knowledge translation The infrastructure required for LHS targets data community and methodology Patient oriented research touches each of these infrastructures However health systems vary in how they execute their mandates to engage and include patients families and communities in the process planning and delivery of health care The question arises as to how well patient oriented research participates within and impacts upon the advancement of LHSs National science policies in the United States European Union and Australia spotlight patient engagement in research Various prominent academic journals feature and prioritize patient oriented research publications including Science Nature and Bioscience Globally there are networks to effect this collaborative research including the Association for the Advancement of Participatory Sciences US Wellesely Centre the HIV Networks in BC and Ontario Zamplo Platform Alberta the Patient and Community Engagement Researchers PaCERs Alberta The Self Research Network ZOON Netherlands Patient Led Research Hub Cambridge University UK the Patient Led Research Collaborative Long COVID European Citizen Science Association Many health systems have framed themselves as patient first or patient centered with organizational policies that set vision statements that action the adage of nothing about me without me To date there has been substantial research across all categories of patient oriented research But the impact embeddedness and value of patient oriented research to advance the goals of LHS is less well known and discussed There is a need to clarify the process methods impact challenges and opportunities of mobilizing patient oriented research to advance LHS Examples of the nexus between LHS and patient oriented research could be demonstrated through examples that have gone well or where barriers have gotten in the way of impact Where

patient oriented research has successfully partially completely or not at all effected change in the health system there is a need for understanding the types of methods used clarifying the role of patients and health systems in problem definition study design implementation and or translation understanding the theoretical frameworks undergirding the approaches understanding relationships processes and integrated knowledge translation techniques to support impactful citizen science and ultimately recommendations and evidence on how to advance citizen science that directly impacts LHS This Research Topic will include manuscripts that aim to address some of the priority areas for the nexus of patient oriented research and LHSs This may include empirical work presenting quantitative qualitative or mixed methods research commentary submissions as well as scoping and systematic reviews We welcome research from a broad range of settings and populations including from low and middle income countries Submissions led or co authored by citizen patients are especially welcome Examples of topic areas include but are not limited to the following Empirically test models of engagement or integrated knowledge translation in patient and public involvement research Describe methods roles partnerships used to embed patient oriented research in learning health systems Describe protocol papers and or report outcome papers prospectively designed patient and public involvement in research that collaboratively define problems conduct research translate findings and or implement change in health systems Systematically review learning health system or patient oriented research literature on the impact of this type of engagement and or the most effective impactful methods of patient oriented research
