Businesses face a new frontier of operational dilemmas from algorithmic bias and data privacy concerns to the legal and ethical quandaries of AI generated content. Questions of accountability for AI actions, intellectual property rights, and the threat of data laundering or AI hallucinations further complicate the landscape. Amid these challenges, enterprises are tasked with navigating a pre-regulatory era where global authorities are racing to establish policies and frameworks for a trustworthy and lawful AI ecosystem. The AI Governance Handbook is a comprehensive guide tailored for stakeholders at the forefront of AI adoption: executives, managers, data scientists, engineers, and compliance professionals. This essential resource provides the knowledge, tools, and strategies to lead organizations through the complexities of implementing AI responsibly and effectively. Packed with actionable insights, the handbook explores critical topics such as aligning AI strategies with organizational objectives, managing ethical dilemmas, adhering to emerging regulations, and fostering transparency in AI operations. It offers readers a roadmap to build a resilient and dependable AI framework, prioritizing fairness, accountability, and innovation.

Programming Large Language Models with Azure Open AI Francesco Esposito, 2024-04-03. Use LLMs to build better business software applications. Autonomously communicate with users and optimize business tasks with applications built to make the interaction between humans and computers smooth and natural. Artificial Intelligence expert Francesco Esposito illustrates several scenarios for which a LLM is effective: crafting sophisticated business solutions, shortening the gap between humans and software-equipped machines, and building powerful reasoning engines. Insight into prompting and conversational programming with specific techniques for patterns and frameworks unlock how natural language can also lead to a new, advanced approach to coding. Concrete end-to-end demonstrations featuring Python and ASP.NET Core showcase versatile patterns of interaction between existing processes, APIs, data, and human input. Artificial Intelligence expert Francesco Esposito helps you understand the history of large language models and conversational programming. Apply prompting as a new way of coding. Learn core prompting techniques and fundamental use cases. Engineer advanced prompts including connecting LLMs to data and function calling to build reasoning engines. Use natural language in code to define workflows and orchestrate existing APIs. Master external LLM frameworks. Evaluate responsible AI security, privacy, and accuracy concerns. Explore the AI regulatory landscape. Build and implement a personal assistant. Apply a retrieval-augmented generation (RAG) pattern to formulate responses based on a knowledge base. Construct a conversational user interface.

For IT Professionals and Consultants: For software professionals, architects, lead developers, programmers, and Machine Learning enthusiasts. For anyone else interested in natural language processing or real-world applications of human-like language in software.
