

## Light Speed Astrology

- My preference: all things being equal, start with transiting Pluto and work in to transiting Jupiter
- The slowest planets have the most powerful effects
  - There's also a lot to be said for starting with outer planet conjunctions to sensitive natal points!

Astrology is the study that everything that exists on earth has a meaningful purpose and we are not living in isolation in this universe This knowledge is for those who want to understand the intricacies of human life Serious astrology requires in depth study of texts scriptures and some kind of intuition as predictions cannot be based only on mathematical calculations Astrology believes that everything is controlled by celestial bodies otherwise predictions are completely impossible This human body is part of existence and the movement of celestial bodies affects us It is a science as well as art Time is a great teacher but it also throws dust on what is not prevalent or what we leave behind Every now and then we need to hone our skills to stay sharp Similarly the knowledge which gets disappears now needs to be uncovered and sharpened At present there is a need for a new way of interpretation that is suitable for the changing world and new environment there is a need for relevant examples which are suitable for the present generation This book explains astrological principles with a new set of examples in the changing environment so that the present generation can understand the hidden meaning behind the ancient texts      *Astrology for the Age of Aquarius* Jan Kurrels,1992 A complete guide to astrology consisting of four parts the story of astrology the Zodiac the Sun signs and a dictionary of astrology mythology and astronomy      *Faster Than Light* Nick Herbert,1989-11-30 Even though most physicists believe that the speed of light is as fast as anyone can go Einstein's theory of special relativity does not rule out faster than light FTL travel On the contrary it seems to indicate that certain superluminal or FTL effects would permit us to re experience the past time travel would become a reality not science fiction Through this crack in the cosmic egg steps Herbert a Stanford physicist and author of *Quantum Reality* who summarizes clearly current speculation and theory about faster than light travel Along with space warps black holes and tachyons hypothetical FTL particles he looks at the so called quantum connection an alleged force said to instantaneously link any two subatomic particles long after they have bumped into each other Free of the woolgathering that tints much writing on the new physics this brave exciting book should send scientists back to their drawing boards for the nonspecialist reader it reveals a world much stranger than *Star Trek* Publishers Weekly Original challenging and audacious San Diego Magazine
