Atomization And Sprays Journal:

Atomization and Sprays, 2007 **Atomization and Sprays**, 2009 **Droplets and Sprays** Sergei Sazhin, 2014-05-19
Providing a clear and systematic description of droplets and spray dynamic models this book maximises reader insight into the underlying physics of the processes involved outlines the development of new physical and mathematical models and broadens understanding of interactions between the complex physical processes which take place in sprays Complementing approaches based on the direct application of computational fluid dynamics CFD Droplets and Sprays treats both theoretical and practical aspects of internal combustion engine process such as the direct injection of liquid fuel subcritical heating and evaporation Including case studies that illustrate the approaches relevance to automotive applications it is also anticipated that the described models can find use in other areas such as in medicine and environmental science Droplets and Sprays: Simple Models of Complex Processes Sergei S. Sazhin, 2022-06-28 This book acts as a guide to simple models that describe some of the complex fluid dynamics heat mass transfer and combustion processes in droplets and sprays Attention is focused mainly on the use of classical hydrodynamics and a combination of kinetic and hydrodynamic models to analyse the heating and evaporation of mono and multi component droplets The models were developed for cases when small and large numbers of components are present in droplets Some of these models are used for the prediction of time to puffing micro explosion of composite water fuel droplets processes that are widely used in combustion devices to stimulate disintegration of relatively large droplets into smaller ones The predictions of numerical codes based on these models are validated against experimental results where possible In most of the models droplets are assumed to be spherical some preliminary results of the generalisation of these models to the case of non spherical droplets approximating them as spheroids are presented
