Handbook of the Economics of Education, 2023-01-18 The Handbook of the Economics of Education describes the research frontier in key topical areas and sets the agenda for further work Modern analysis in the economics of education has made tremendous strides in understanding fundamental issues related to the production of human capital and the impact of varying institutional features of education systems By bringing together some of the world's leading scholars this volume provides a unique view of scholarship in the area The international perspectives of the editors Hanushek at Stanford Machin at LSE and Woessmann at Munich leads to a volume with something for all researchers Topics range from the economics of early childhood education to inequality in society to cash transfers in developing countries Identification and evaluation of the state of the art Clear descriptions of the meaning of existing research and the most likely avenues for the future Insights into how policy interventions in education can help or hurt human capital outcomes *Nordic Economic Policy Review* Nordisk Ministerråd, Annual Review of Comparative and International Education 2020 Alexander W. Wiseman, 2021-08-02 The Annual Review of Comparative and International Education covers significant developments in the field of comparative and international education This 2020 edition begins with a collection of discussion essays about comparative education trends and directions written by both professional and scholarly leaders *Rankings and Accountability in Higher Education: Uses and Misuses* Priscilla Toka Mmantsetsa Marope, Peter J. Wells, Unesco, Ellen Hazelkorn, 2013-01-01 The growing impact of university rankings on public policy and on students choices has stirred controversy worldwide This unique volume brings together the architects of university rankings and their critics to debate the uses and misuses of existing rankings With voices from five continents it provides a comprehensive overview of current thinking on the subject and sets out alternative approaches and complementary tools for a new era of transparent and informed use of higher education ranking tables Love, Money, and Parenting Matthias Doepke, Fabrizio Zilibotti, 2019-02-05 An international and historical look at how parenting choices change in the face of economic inequality Parents everywhere want their children to be happy and do well Yet how parents seek to achieve this ambition varies enormously For instance American and Chinese parents are increasingly authoritative and authoritarian whereas Scandinavian parents tend to be more permissive Why Love Money and Parenting investigates how economic forces and growing inequality shape how parents raise their children From medieval times to the present and from the United States the United Kingdom Germany Italy Spain and Sweden to China and Japan Matthias Doepke and Fabrizio Zilibotti look at how economic incentives and constraints such as money knowledge and time influence parenting practices and what is considered good parenting in different countries Through personal anecdotes and original research Doepke and Zilibotti show that in countries with increasing economic inequality such as the United States parents push harder to ensure their children have a path to security and success Economics has transformed the hands off parenting of the 1960s and 70s into a

frantic overscheduled activity Growing inequality has also resulted in an increasing parenting gap between richer and poorer families raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds In nations with less economic inequality such as Sweden the stakes are less high and social mobility is not under threat Doepke and Zilibotti discuss how investments in early childhood development and the design of education systems factor into the parenting equation and how economics can help shape policies that will contribute to the ideal of equal opportunity for all Love Money and Parenting presents an engrossing look at the economics of the family in the modern world
