The Design of Digital Democracy Gianluca Sgueo,2023-08-11 Ever stronger ties between technology entertainment and design are transforming our relationship with democratic decision making When we are online or when we use digital products and services we tend to focus more on certain factors like speed of service and user friendliness and to overlook the costs both for ourselves and others As a result a widening gap separates our expectations of everything related to digitalization including government and the actual practice of democratic governance Democratic regulators unable to meet citizens

demands for tangible fast and gratifying returns are seeing the poorest results ever recorded in terms of interest engagement and retention despite using the most cutting edge technologies This book explores various aspects of the relationship between democracy technology and entertainment These include on the one hand the role that digital technology has in strengthening our collective intelligence nurturing empathic relations between citizens and democratic institutions and supporting processes of political aggregation deliberation and collaboration On the other hand they comprise the challenges accompanying digital technology for representation transparency and inclusivity in democratic decision making The book s main argument is that digital democratic spaces should be redesigned to narrow the gap between the expectations and outcomes of democratic decision making It suggests abandoning the notion of digital participatory rights as being fast and easy to enjoy It also refutes the notion that digital democratic decision making can only be effective when it delivers rapid and successful responses to the issues of the day regardless of their complexity Ultimately the success or failure of digital democracy will depend on the ability of public regulators to design digital public spaces with a commitment to complexity so as to make them appealing but also effective at engaging citizens *Robotics in Life* Aiden

Feynman, AI, 2025-02-22 *Robotics in Life* explores the expanding influence of robots in our workplaces and homes highlighting the importance of understanding their capabilities and limitations as they become increasingly integrated into daily life The book examines how robots are transforming industries like manufacturing and healthcare while also looking at their growing presence as domestic helpers for cleaning companionship and elder care A key focus is on the ethical and societal implications addressing concerns like job displacement and algorithmic bias thereby providing a balanced view of this technological revolution The book progresses from the fundamental principles of robotics such as robot kinematics and control systems to specific applications in various sectors It delves into the world of domestic robots including robotic vacuum cleaners and smart home assistants before discussing the broader societal impacts What makes this book unique is its blend of technical analysis with ethical considerations prompting readers to consider not just what robots can do but what they should do It emphasizes the need for responsible development and deployment of robots ensuring they positively contribute to society *HCI in Business* Fiona Fui-Hoon Nah, Chuan-Hoo Tan, 2015-07-20 This volume constitutes the refereed proceedings of the Second International Conference on HCI in Business HCIB 2015 held as part of the 17th International Conference on Human Computer Interaction HCII 2015 which took place in Los Angeles CA USA in August 2015 HCII 2015 received a total of 4843 submissions of which 1462 papers and 246 posters were accepted for publication after a careful reviewing process The papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems They thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The 72 papers presented in this volume address the following topics social media for business enterprise systems business and gamification
