## Reddit Update Store Hours:

**Decentralization** Craig Calcaterra, Wulf Kaal, 2021-03-08 Entrepreneurs as well as seasoned business leaders are struggling to innovate and stay ahead of change in the age of decentralization What separates the companies that get disrupted from the ones that thrive when faced with decentralization What tactics can be deployed to decentralize large monolithic organizations Drawing on their experience as researchers and tech entrepreneurs Professors Calcaterra and Kaal show how to Learn to embrace the change that comes with decentralization Evolve technology communication and culture as the business encounters decentralization Use best practices to maintain profitability in the emerging environments of decentralization across industries Combine responsibility with velocity to leverage the advantages of decentralization for the common good The book examines the core infrastructure elements that are needed before the first genuinely decentralized transaction can happen including a legal environment underwriting a truly decentralized blockchain that can overcome the blockchain trilemma decentralization scaling security and efficient governance of blockchains Decentralization is essential reading for businesses seeking to win in an increasingly decentralized world where adaptation speed is the competitive advantage that matters most *Lurking* Joanne McNeil, 2020-02-25 One of Esquire's Best Books to Elevate Your Reading List in 2020 and a OneZero Best Tech Book of 2020 Named one of the 100 Notable books of 2020 by the End of the World Review A concise but wide ranging personal history of the internet from for the first time the point of view of the user In a shockingly short amount of time the internet has bound people around the world together and torn us apart and changed not just the way we communicate but who we are and who we can be It has created a new unprecedented cultural space that we are all a part of even if we don't participate that is how we participate but by which we're continually surprised betrayed enriched befuddled We have churned through platforms and technologies and in turn been churned by them And yet the internet is us and always has been In *Lurking* Joanne McNeil digs deep and identifies the primary if sometimes contradictory concerns of people online searching safety privacy identity community anonymity and visibility She charts what it is that brought people online and what keeps us here even as the social equations of digital life what we're made to trade knowingly or otherwise for the benefits of the internet have shifted radically beneath us It is a story we are accustomed to hearing as tales of entrepreneurs and visionaries and dynamic and powerful corporations but there is a more profound intimate story that hasn't yet been told Long one of the most incisive ferociously intelligent and widely respected cultural critics online McNeil here establishes a singular vision of who we are now tells the stories of how we became us and helps us start to figure out what we do now **Restaurants & Institutions**, 2009 [Astronomy Now](#), 2001
