Cann, 2026-03-10 A provocative rethinking of the intersection of death technology and disability for a better life We are all cyborgs relying on technology whether it's Alexa a pacemaker or a titanium knee for our quotidian existence In our deep connection to a technological world from robots to augmented and virtual realities metaverses and gaming Candi Cann sees an opportunity and good reason to question our ideas about accessibility and inclusion In *augmented* she asks us to reconsider traditional notions of biology and death Having relied on hearing aids from the age of four Cann uses her experience to challenge readers to reconsider their assumptions about technologies and their role in life and death She also focuses on what it means that most of us are living longer with the intervention of medical technologies and how a better understanding of our relationship to technology will grant us greater control as we age Drawing on her life experience in Asia the author explains how cultural and religious views of machines and artificial intelligence vary globally in particular how a Western fear of machines contrasts with an animistic worldview that can see machines as conduits of care for others embedding spiritual possibilities **All of Me (An Opposites Attract, Billionaire Romance)** K E Osborn, 101-01-01
