A Critical Rewriting of Global Political Economy V. Spike Peterson, 2004-03-01. Moving beyond a narrow definition of economics, this pioneering book advances our knowledge of global political economy and how we might critically respond to it. V. Spike Peterson clearly shows how two key features of the global economy increasingly determine everyday lives worldwide. The first is explosive growth in financial markets that shape business decision making and public policy making, and the second is dramatic growth in informal and flexible work arrangements that shape income generation and family wellbeing. These developments, though widely recognized, are rarely analyzed as inextricable and interacting dimensions of globalization. Using a new theoretical model, Peterson demonstrates the interdependence of reproductive, productive, and virtual economies and analyzes inequalities of race, gender, class, and nation as structural features of neoliberal globalization. Presenting a methodologically plural, cross-disciplinary, and well-documented account of globalization, the author integrates marginalized and disparate features of globalization to provide an accessible narrative from a postcolonial feminist vantage point.

China and the Global Political Economy S. Breslin, 2016-04-30. This IPE Classic considers one of the most pressing issues of the Twenty-First century: the relationship between domestic configurations of power and globalized production processes in shaping the process and implications of China's re-engagement with the global economy.

Global Political Economy Theodore H. Cohn, 2008. Praised for its authoritative coverage of theory and history, *Global Political Economy* places the study of IPE in the broadest global context. Written by one of the field's leading scholars, this text helps students understand the fundamental importance of international political economy and make sense of current events in the global economy. Its three areas of focus—globalization, North-North relations, and North-South relations—encourage students to connect theory and history with practice, explore domestic and international economic interactions, and examine the critical relationship between economic and security issues.
