Holmes,2014-08-21 *Lessons in the New Geography* Spencer Trotter,2015-06-04 Excerpt from Lessons in the New Geography We live in a world of ideas The real things of life impress themselves upon our brains through our senses and are grouped as so many mental pictures in the various complex relations which they hold to one another In studying Geography the child very early gains ideas or mental pictures of different scenes and places and it is of the utmost importance that these pictures be not only true but living ideas of the things themselves It should be impressed upon every child that Geography is a part of his everyday life not a mere learning of the names of places but a living reality The imagination that quality of the brain which enters so largely into child life peopling its wonderland with fairies and creations of fancy is the one element needful in gaining the ideas of real things In proportion as a study stimulates the imaginative faculty does it near the end in view of all study that of creating a fulness of interest in life and in the lives of every man and woman The purpose of this book is to bring this conception of Geography to the teacher s mind The map is a means of gaining clear ideas of the positions of places on the earth s surface in relation to one another We all carry mental maps in our brains Our sense of direction is often determined by the early use or 4 misuse of maps About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
