

## Algebra 2B - Activity 10.2

1. Based on the grid below, identify each function below as being a polynomial function. Explain.

2. Identify each of the functions below that are **not** polynomials. Explain. These are things you should know how to do now (you can be looking at the function's graphability to determine if **not** - not as good as looking at graph).

This is being graphed with the tool for the same reason.

3. Graph each of the functions part 2 (including all graphs of that were not with a **U** like smoothness of something with a **U** shape). If something is not graphable, then, graph **not** polynomial.

Remember, the functions that **are** graphable are polynomials (and **not** polynomials with **U** like smoothness or **U** like shape). If something is not graphable, then, graph **not** polynomial.

Remember, if the curve isn't straight, it's not a polynomial.
