The Guardian Index, 2000 [Where the Evidence Leads](#) Robert C. Johansen, 2021 By shifting American security policy away from maximizing military power for the United States and toward maximizing human security for all policymakers and citizens can also maximize national security for the United States and sustainable peace for the world Why do war and political violence persist Political realists argue that violent conflict and the struggle for power are inherent in the international system and there is little we can do but manage it However as Robert Johansen argues in this path breaking work there are other ways forward In *Where the Evidence Leads* Johansen develops an empirical realist theory to enable the United States to respond more effectively to rising security threats Together peace research and security studies show that more security benefits are likely to result from maximizing the causes or correlates of peace than from maximizing military power Ironically a global grand strategy for human security with national security folded into it is likely to produce more security for the United States than a national security strategy Peace reigns when states implement peace correlates which range from addressing all nations security fears to making life more predictable through better global governance This approach respectful of forgotten insights from Hans Morgenthau and others revolutionizes thinking about national security policy by bringing it into a human security framework The analysis shows that the anarchic militarized balance of power system can be gradually changed with help from enhanced lawmaking enforcement and governance capacities This thought provoking book builds bridges between past policies many of which have failed and more deft ways of handling new realities that focus on building peace In a world of threats this book opens doors onto a future of sustainable peace security and hope

Reproducing Refugees Anna Carastathis, Myrto Tsilimpounidi, 2020-02-11 Since 2015 the refugee crisis is possibly the most photographed humanitarian crises in history Photographs taken for instance in Lesbos Greece and Bodrum Turkey were instrumental in generating waves of public support for and populist opposition to welcoming refugees

in Europe But photographs do not circulate in a vacuum this book explores the visual economy of the refugee crisis showing how the reproduction of images is structured by and secures hierarchies of gender sexuality and race essential to the functioning of bordered nation states Taking photography not only as the object of research but innovating the method of photograph a the material trace of writing graf with light phos this book urges us to view images and their reproduction critically Part theoretical text part visual essay Reproducing Refugees vividly shows how institutional violence underpins both the spectacularity and the banality of crisis This book goes about synthesising visual studies with queer feminist postcolonial post structuralist and post Marxist theories Carastathis and Tsilimpounidi offer theoretical frameworks and methodological tools to critically analyse representations both those circulated through hegemonic institutions and those generated from below They carve a space between logos and praxis ways of knowing and ways of doing by offering a new visual language that problematises reified categories such as that of the refugee and makes possible disruptive alternative resistant perceptions The book contributes to the fields of migration and border studies critically engaging visual narratives drawn from migration movements to question dominant categories and frameworks from a decolonial no borders queer feminist perspective

The Scholarly Journal in the GDR Michael Lörch,2025-10-27

This volume goes beyond treating periodicals as mere sources of information and explores the forces shaping scholarly journals that typically remain hidden to their readers It examines the four decade run of the Zeitschrift f r Anglistik und Amerikanistik ZAA in the German Democratic Republic using numerous previously unpublished archival sources It reveals how beyond economics and academia politics and ideology can play a decisive role in how a humanities journal is produced and read across borders The volume thus provides an eye opening look at the ways journals are shaped by much more than academic trends not only in the context of the Cold War but also today in our increasingly politicized world

The Fate of Abraham Peter Osborne,2022-05-12

As the Cold War faded into history it appeared to have been replaced by a new conflict between Islam and the West Or so we are told After the events of 9 11 and the advent of the war on terror this narrative seemed prophetic But as Peter Osborne reveals in this masterful new analysis the concept of an existential clash between the two is a dangerous and destructive fantasy Based on rigorous historical research and forensic contemporary journalism that leads him frequently into war torn states and bloody conflict zones Osborne explains the myths fabrications and downright lies that have contributed to this pernicious state of affairs He shows how various falsehoods run deep reaching back as far as the birth of Islam and have then been repurposed for the modern day Many in senior positions in governments across the West have suggested that Islam is trying to overturn our liberal values and even that certain Muslims are conspiring to take over the state while Douglas Murray claims in his new book that we face a War on the West But in reality these fears merely echo past debates as we continue to repeat the pattern of seemingly wilful ignorance With murderous attacks on Muslims taking place from Bosnia in 1995 to China today Osborne dismantles the falsehoods that lie behind them and he opens the way

to a clearer and more truthful mutual understanding that will benefit us all in the long run The Athenaeum ,1880
