Zappavigna, Andrew S. Ross, 2024-12-27 *Innovations and Challenges in Social Media Discourse Analysis* provides a key introduction to the analysis of everyday discourse on social media platforms. Outlining the challenges involved in the study of social media discourse that includes social interaction, relationality, intersubjectivity, and intermodality, this book takes a social semiotic approach to offer a useful reconceptualisation of existing tools and introduces new methodologies to help those studying in this area. Drawing on a range of corpora that feature tweets, Instagram photos, YouTube comments, and emoji, this book is essential reading for students studying modules on discourse analysis and language and media.

**Influencer Marketing. A Measurement Instrument to determine the Credibility of Influencers** Christin Smuda, 2018-10-02  
Bachelor Thesis from the year 2018 in the subject Communications Public Relations Advertising Marketing Social Media grade 1.0 University of Applied Sciences M nchen language English abstract The aim of this thesis is to develop a measurement scale to determine the credibility of influencers in today's digitalized environment. Thus an extensive literature review will be conducted to reveal underlying dimensions, concepts, and impact models of the social construct credibility. Those examinations will provide a well-founded overview of the current academic research in this field and will guide the author to the subsequent empirical investigation. Aligning with the structure of key sources, the researcher decided on a sequential exploratory research design consisting of a qualitative questionnaire which serves as a reliable foundation of the subsequent quantitative questionnaire. Thereby the qualitative survey aims to define and refine the items of the credibility scale, select exemplary influencers for the following rating process, and give the author a first feel about the respondents' perception of credibility. In contrast, the purpose of the quantitative survey is to collect an extensive amount of data (n=385) to further select descriptor items that consumers associate with credible influencers and therewith build a reliable and valid base for further analytical calculations.
