After over 11 warranty replacements, I have finally given up on the WH1000XM5s.

I bought a brand new pair of XM5s a year ago. After 3 weeks of normal use, they just stopped charging. They switched on and functioned, but wouldn't charge (no orange light). Tried different cables, bricks, outlets, resetting etc. Nothing worked. So I sent them back to Sony for a replacement.

After 2 weeks of getting the 1st brand new replacement, same problem. So I replaced them again. With the 2nd replacement, I made sure to use only the provided charging cable (not my phone's fast charger). 1 week in, same thing. I replaced them again, and again it kept happening. I kept trying to figure out if it was anything I was doing that was killing them, but I couldn't. They kept dying.

My most recent replacement is the 11th one. It arrived mid-December. I just tried to charge it tonight and it's dead as well. I have officially given up. I'm going to get my 12th replacement and sell it on eBay and switch to another pair. The funny thing is, my backup headphones are the Sony WH-CH520s. They worked the entire time I was without my XM5s and will be my go tos until my new pair comes in.

I'm posting here in case I'm an idiot and there's some super obvious thing I'm doing to kill my headphones. Maybe a solution will come off this. Feel free to suggest alternate headphones of similar quality/price.
