Taxation of Petroleum Products Mrs.Poonam Gupta,Mr.Walter Mahler,1994-03-01 The domestic taxation of petroleum products is an important source of revenue in most countries However there is a wide variation of tax rates on petroleum products across countries which cannot be explained by economic theory alone This paper surveys different considerations advanced for taxing petroleum and presents petroleum tax rate data in 120 countries It concludes that a significant reduction in the present extremely wide variation in petroleum prices and tax rates appears warranted

Stock Prices, Real Exchange Rates, and Optimal Capital Accumulation International Monetary Fund,1988-04-05 This paper analyzes the dynamics of the real exchange rate and the price of equity for a small open economy using an optimizing model in which the process of capital accumulation entails adjustment costs The analysis demonstrates that along an adjustment path toward long run equilibrium appreciation of the real exchange rate will accompany a decline in the market price of equity whereas depreciation of the real exchange rate will accompany a rise in the price of equity This relationship results from the requirement that non traded inputs are used in the investment process In the short run though the effects on these variables depend critically on whether disturbances originate in the non traded sector and on whether disturbances are perceived as temporary or permanent The disturbances considered include changes in fiscal policies as well as changes in the world interest rate
