Brooks, Dorota Stasiak, 2016-04-22 In the world of Wikipedia blogging and citizen journalism where huge masses of information and the capability to disseminate opinions thoughts and ideas is available at the click of a mouse what is the role and impact of political experts The contributors to this insightful and original volume argue that across the western world in general the political expert occupies as important a role today as at any time in the past The ubiquity of information and the fact that the experts and the organizations to which they are affiliated may be viewed as having an ideological agenda has not diminished their role influence or status Governments and the media still rely on them for information and advice whilst organizations in civil society need them in order to provide the evidence arguments and policy recommendations that are essential to having a voice in the public conversation By examining how these policy experts and their think tanks continue to exert influence across a range of modern western democracies a better understanding of the role of policy expertise and an examination of how it may develop and evolve throughout the rest of the world is reached Politics of the Wild Karen Beazley, Robert Boardman, 2001 Politics of the Wild details the 353 species at risk in Canada and considers both the intrinsic and the instrumental reasons for protecting biological diversity It examines the need for habitat protection terrestrial protected areas such as national parks marine species at risk and the various legislative and interest group attempts to preserve biodiversity Public policy on endangered species is considered from both historical and comparative perspectives as is Canada's role in establishing international agreements the Convention on International Trade in Endangered Species and the Convention on Biological Diversity and the government's failure in recent years to meet the obligations of these and other environmental agreements The final chapter looks at the Species at Risk Act SARA and its recent predecessor Bill C 65 and reveals the difficulties of crafting and passing such legislation in an increasingly decentralized federal state such as Canada Both legislative attempts were criticized by the environmental policy community for not doing enough and by the provinces and business for trying to do too much All the while diverse regional interests and economic imperatives run the risk of endangering far more than merely Canadian species at risk **Governing the Energy Challenge** G. Bruce Doern, Burkard Eberlein, 2009-01-01 Governing the Energy Challenge is a comparative study between Canada and Germany that features essays by leading energy and public policy specialists from both countries
