Exploring Language Pedagogy through Second Language Acquisition
Research Rod Ellis, Natsuko Shintani, 2013-07-31 Routledge. *Introductions to Applied Linguistics* is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies or taking an introductory MA course as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative practice-to-theory approach with a back-to-front structure. This leads the reader from real world problems and issues through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Additional features include a glossary of key terms and discussion questions. Following the back-to-front approach of the series, the book takes problematic issues in language pedagogy as its starting points. These are then examined in terms of second language acquisition. Each chapter begins with a look at the pedagogical proposals found in teacher guides and then asks: Do these proposals accord with what we know about how languages are acquired? Pedagogical topics covered include teaching methods, syllabus design, explicit instruction, comprehension versus production based instruction, task based instruction, authentic materials, the role of the learners' first language in the classroom, error correction, and catering for individual differences. Including a glossary of key terms and questions for discussion at the end of each chapter and assuming no prior knowledge of second language acquisition, this is the ideal text for all students studying language teaching methods, language teacher education, English teaching methodology, and second language acquisition modules in advanced undergraduate and postgraduate graduate TESOL and Applied Linguistics courses.
