Drumbl,Kirsten J.

Fisher,2026-04-20 This book challenges the simplicity predestination and self evident nature of contemporary narratives of transitional justice Transitional justice is the field of study that examines how states should reckon with massive human rights abuses The book upends these assumptive narratives on three crucial fronts The first front is that of innovations Here the book questions the ability of transitional justice to deliver tangible successes in an era of rapid and overwhelming technological change and contestation over what constitutes human memory communicative dialogue and reliable evidence The second front involves boundaries Here the book confronts the professed superpower of transitional justice to do more and more in an endless concatenation of additives While there is cause for optimism this book also suggests that transitional justice remains awkward in how it copes with the existential pressures of environmental health and cultural crises On its third front refractions this book identifies how transitional justice addresses racism misogyny and democratic backsliding How the prism of transitional justice interventions refracts these scourges remains inadequate Throughout the book asks readers to imagine where the field and practice of transitional justice could go from here what new innovations are required what boundaries must be stretched or retrenched and what perspectives need to be considered due to new ways of seeing current and past atrocities Accordingly this book will be of considerable interest to academics practitioners working on post conflict reconstruction and students at all levels ranging from undergraduate to post doctoral in the areas of law politics cultural property criminology human rights international relations and technology studies **Medical Editing** Barbara
