**Exploring GPT-3** Steve Tingiris, Bret Kinsella, 2021-08-27 Get started with GPT 3 and the OpenAI API for natural language processing using JavaScript and Python

**Key Features** Understand the power of potential GPT 3 language models and the risks involved Explore core GPT 3 use cases such as text generation classification and semantic search using engaging examples Plan and prepare a GPT 3 application for the OpenAI review process required for publishing a live application

**Book Description** Generative Pre-trained Transformer 3 GPT 3 is a highly advanced language model from OpenAI that can generate written text that is virtually indistinguishable from text written by humans

Whether you have a technical or non-technical background this book will help you understand and start working with GPT 3 and the OpenAI API

If you want to get hands on with leveraging artificial intelligence for natural language processing NLP tasks this easy to follow book will help you get started

Beginning with a high level introduction to NLP and GPT 3 the book takes you through practical examples that show how to leverage the OpenAI API and GPT 3 for text generation classification and semantic search

You'll explore the capabilities of the OpenAI API and GPT 3 and find out which NLP use cases GPT 3 is best suited for

You'll also learn how to use the API and optimize requests for the best possible results

With examples focusing on the OpenAI Playground and easy to follow JavaScript and Python code samples the book illustrates the possible applications of GPT 3 in

production By the end of this book you will understand the best use cases for GPT 3 and how to integrate the OpenAI API in your applications for a wide array of NLP tasks What you will learn Understand what GPT 3 is and how it can be used for various NLP tasks Get a high level introduction to GPT 3 and the OpenAI API Implement JavaScript and Python code examples that call the OpenAI API Structure GPT 3 prompts and options to get the best possible results Select the right GPT 3 engine or model to optimize for speed and cost efficiency Find out which use cases would not be suitable for GPT 3 Create a GPT 3 powered knowledge base application that follows OpenAI guidelines Who this book is for Exploring GPT 3 is for anyone interested in natural language processing or learning GPT 3 with or without a technical background Developers product managers entrepreneurs and hobbyists looking to get to grips with NLP AI and GPT 3 will find this book useful Basic computer skills are all you need to get the most out of this book

*Empire of AI*  
Karen Hao, 2025-05-20  
A New York Times Notable Book Finalist for the National Book Critics Circle Award  
An Instant New York Times Bestseller  
Named a Best Book of the Year by Smithsonian Scientific American and Elle  
A bestselling page turner that has made waves not just in Silicon Valley but around the world  
With *Empire of AI* Hao is fundamentally shaping many people s perceptions and understanding of the company at the center of the AI revolution  
TIME Magazine TIME100 AI 2025  
Excellent and deeply reported  
Tim Wu The New York Times  
Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us  
Vulture  
From a brilliant longtime AI insider with intimate access to the world of Sam Altman s OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy  
When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys  
Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces  
What could go wrong  
Over time Hao began to wrestle ever more deeply with that question  
Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all  
The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play  
At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations  
Spoiler alert it didn t  
Armed with Microsoft s billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define  
All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry  
Altman s sudden firing and triumphant return  
The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this

technology really are But this isn't just the story of a single company however fascinating it is The forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era
