Reforming Occupational Licensing in the US Clifford Winston, 2024-12-28 Nearly one third of US workers must obtain a license from a government agency to perform their jobs legally This impacts employees across all areas including lawyers doctors and accountants as well as florists hairdressers physical therapists and plumbers The justification for occupational licensing is that potential consumers allegedly lack the information and knowledge to judge the competence of a service provider This necessitates a licensing system built to ensure that customers are served by people who have received adequate training and certification in their profession While there are recognizable benefits of occupational licensing the training and certification requirements create barriers to entry for employees or those entering the profession These barriers can limit competition raise service costs and restrict consumer access to essential services Recent empirical work suggests that consumers have incurred these costs without being adequately protected from incompetent or unscrupulous service providers This book addresses this situation head on In light of occupational licensing s shortcomings the authors of this book propose and analyze constructive reforms assessing their effects on key professions such as law medicine and finance Chapters identify the significant costs of current policies and they recommend practical reforms that rely more on market forces The resulting book provides new ways to reduce licensing costs without compromising service quality

Mastering AI Jeremy Kahn, 2025-07-08 A Fortune magazine journalist draws on his expertise and extensive contacts among the companies and scientists at the forefront of artificial intelligence to offer dramatic predictions of AI s impact over the next decade from reshaping our economy and the way we work learn and create to unknitting our social fabric jeopardizing our democracy and fundamentally altering the way we think Within the next five years Jeremy Kahn predicts AI will disrupt almost every industry and enterprise with vastly increased efficiency and productivity It will restructure the workforce making AI copilots a must for every knowledge worker It will revamp education meaning children around the world can have personal portable tutors It will revolutionize health care making individualized targeted pharmaceuticals more affordable It will compel us to reimagine how we make art compose music and write and publish books The potential of generative AI to extend our skills talents and creativity as humans is undeniably exciting and promising But while this new technology has a bright future it also casts a dark and fearful shadow AI will provoke pervasive disruptive potentially devastating knock on effects Leveraging his unrivaled access to the leaders scientists futurists and others who are making AI a reality Kahn will argue that if not carefully designed and vigilantly regulated AI will deepen income inequality depressing wages while imposing winner take all markets across much of the economy AI risks undermining democracy as truth is overtaken by misinformation racial bias and harmful stereotypes Continuing a process begun by the internet AI will rewire our brains likely inhibiting our ability to think critically to remember and even to get along with one another unless we all take decisive action to prevent this from happening Much as Michael Lewis s classic *The New New Thing* offered a prescient insightful and
