   Problem Solving with Algorithms and Data Structures Using Python Bradley N. Miller,David L. Ranum,2014   **Problem Solving with Algorithms and Data Structures Using Python, 3rd Edition** Bradley N. Miller,David L. Ranum,Roman Yasinovskyy,2023 This textbook is designed to serve as a text for a first course on data structures and algorithms typically taught as the second course in the computer science curriculum Even though the second course is considered more advanced than the first course this book assumes you are beginners at this level You may still be struggling with some of the basic ideas and skills from a first computer science course and yet be ready to further explore the discipline and continue to practice problem solving Computer science is like any other difficult subject matter where you become successful through deliberate step by step exposure to the fundamental ideas A beginning computer scientist needs practice to gain thorough understanding before advancing to more complex parts of the curriculum A beginner also needs opportunities to be successful and gain confidence This book achieves these goals by exposing new concepts incrementally while building on previously covered topics Furthermore we use the Python programming language as we believe that provides the perfect setting for exploring these ideas We cover abstract data types and data structures writing algorithms and solving problems We look at a number of data structures and solve classic problems that arise The tools and techniques that you learn here will be applied over and over as you continue your study of computer science This textbook has three key features A strong focus on problem solving introduces students to fundamental data structures and algorithms by providing a very readable text without introducing on overwhelming amount of new language syntax Algorithm analysis in term of Big O running time is introduced early and applied throughout Python is used to facilitate the success of beginning students in using and mastering data structures and algorithms   **Problem Solving in Data Structures and Algorithms Using Java** Hemant Jain,2018-09-23 Problem Solving in Data Structures Algorithms is a series of books about the usage of Data Structures and Algorithms in computer programming The book is easy to follow and is written for interview preparation point of view In these books the examples are solved in various languages like Go C C Java C Python VB JavaScript and PHP GitHub Repositories for these books https github com Hemant Jain Author Book s Composition This book introduces you to the world of data structures and algorithms Data structures defines the way in which data is arranged in memory for fast and efficient access while algorithms are a set of instruction to solve problems by manipulating these data structures Designing an efficient algorithm is a very important skill that all software companies e g Microsoft Google Facebook etc pursues Most of the interviews for these companies are focused on knowledge of data structures and algorithms They look for how candidates use concepts of data structures and algorithms to solve complex problems efficiently Apart from knowing a programming language you also need to have good command of these key computer fundamentals to not only qualify the interview but also excel in you jobs as a software engineer This book assumes that you are a Java language developer You are not an expert in

Java language but you are well familiar with concepts of classes functions arrays pointers and recursion At the start of this book we will be looking into Complexity Analysis followed by the various data structures and their algorithms We will be looking into a Linked List Stack Queue Trees Heap Hash Table and Graphs We will also be looking into Sorting Searching techniques In last few chapters we will be looking into various algorithmic techniques Such as Brute Force algorithms Greedy algorithms Divide and Conquer algorithms Dynamic Programming Reduction and Backtracking Table of Contents Chapter 0 How to use this book Chapter 1 Algorithms Analysis Chapter 2 Approach to solve algorithm design problems Chapter 3 Abstract Data Type JAVA Collections Chapter 4 Searching Chapter 5 Sorting Chapter 6 Linked List Chapter 7 Stack Chapter 8 Queue Chapter 9 Tree Chapter 10 Priority Queue Chapter 11 Hash Table Chapter 12 Graphs Chapter 13 String Algorithms Chapter 14 Algorithm Design Techniques Chapter 15 Brute Force Algorithm Chapter 16 Greedy Algorithm Chapter 17 Divide Conquer Chapter 18 Dynamic Programming Chapter 19 Backtracking Chapter 20 Complexity Theory
