Does economic development lead to political democracy? Or does political democracy generate economic development? Through reviewing literature of political economy of development, this study attempts to show audience at least five possible patterns and theoretical explanations of the connections between development and democracy. They are: 1) development first, democracy later, also modernization theory, 2) political change process, 3) development not leads to democracy, 4) democracy first, development later, and 5) democracy not matters in development. Furthermore, I point out that in the process of democratization economic development varies from stage to stage: it declines in the early phase, but increases in the later; investigating economic change corresponding to political transition is critical to reconsider the causality between development and democracy. Lastly, I conclude that the controversy over development and democracy is inconclusive and will be continuing.
