Customers choose products and services that deliver the best experiences. Traditional design techniques like sketching and model making are less effective when designing complex systems of objects, services, and experiences. Perhaps the most powerful new methods available for designers and managers are the group of techniques collectively known as experience maps. One of the most important types of experience maps is the empathy map. An empathy map is a strategic tool for capturing key insights into the complex customer interactions that occur across experiences with a product and service ecosystem. Empathy maps are being quickly adopted by designers and organizations all over the world. Designing for your customer's entire experience is key to differentiating your design from designs of competitors in an increasingly crowded competitive marketplace. Through applying these methods, designers and managers can create a holistic user experience by uncovering precisely where to focus efforts to deliver a more compelling and valuable experience. Mapping builds knowledge and consensus across teams and stakeholders to positively impact your entire organization as well as your customers and designers and your organization's bottom line. A minha crença sobre gestão e suas ferramentas que devemos conhecer para saber selecionar quais são importantes para cada desafio de negócio existente. Não existe um roteiro pré-definido que atenda a todos os modelos de negócio. Devemos conhecer os componentes e as ferramentas disponíveis mas a forma como as utilizaremos e iremos combiná-las depende de cada ambiente de negócio, estratégia, cultura e estilo de liderança. A figura que melhor representa esta metáfora é o Lego no qual cada empreendedor e ou gestor com bricolagem e prototipa o desenvolve soluções inovadoras uma vez que cada gestor deve ser um artista que inova no modelo de gestão e amplia a criação de valor para a empresa e para a sociedade. Neste sentido um dos desafios pessoais no qual me coloco enquanto cidadão é poder compartilhar as ferramentas de produtividade que aprendi nos últimos 50 anos de vida e 30 anos de consultoria a partir de interações em diversas empresas e setores. Além da atividade de consultor desenvolvo-me como pesquisador de gestão e comportamento humano e tenho dado palestras e aulas em diversos programas de MBA. O objetivo deste livro é compartilhar conceitos e ferramentas de gestão que permitam a gestores de diversos níveis a ampliarem sua visão integrada da cadeia de valor combinando as práticas funcionais em um modelo integrado de gestão em uma visão holística. Dessa forma o livro serve como um kit de sobrevivência e comunicação entre as áreas permitindo um aumento de performance e produtividade do trabalho algo tão fundamental para o desenvolvimento de nossa sociedade com responsabilidade ética e foco humano bem como sustentabilidade econômica, ambiental e social.
