

Questions About the Missing Person Lab

Base your answers to the following questions on what you have learned. Glue the questions into your ISN as a stamp grade.

1. What did you observe about the outfits within the same column (family or group)? Why do you think they are wearing similar clothes?

They wear clothes with similar colors to symbolize that they are a group/family. The only difference is that the older ones they have, the bigger they are. They have similar properties.

2. What can the increase in the size of the "cousins" be compared to on the periodic table?

The bigger the cousins, the larger the mass.

3. How does the number of arms each cousin has relate to the number of energy levels that exist for specific atoms?

The number of arms represents the number of energy levels on an atom because both wear heads and energy levels are circles.

4. What is the significance of the number of fingers on each of the hands?

The number of fingers symbolize the amount of electrons it contains.

5. Compare the number of hairs on the heads of the cousins to valence electrons. How does this observation relate to Mendeleev's work?

The number of hairs on their heads represent the number of valence electrons. Mendeleev organized the periodic table by valence electrons.

6. Why are some cousins smiling while others are frowning? (Hint: Some atoms need only to gain or lose one, two, or three electrons to have a full outer energy shell.)

The smiling cousins are the ones with full energy shells. The ones who are not don't.

Anatomy Lesson Raymond Obstfeld,2008-04 Stevie Croft Orange County s most successful prosecutor is running a losing

campaign for district attorney when she is assigned to the most heinous crime in the county's history. A body is discovered composed of the severed parts from five different people all crudely sewn together to form one grotesque corpse. Stevie has the chance to ride this high profile case right into office. Then the killer begins leaving cryptic messages for Stevie in her home, in her office, even in her purse. Calling himself The Tutor, he claims that deciphering these clues will not only lead her to his identity but save the lives of his future victims. His taunting clues target her darkest secret since she was 10. Stevie has hyper memory, a combination of photographic memory and total recall which causes her to precisely remember everything she's ever seen, heard, or read. While often a strength that gives her a competitive edge, this condition is also her Achilles' heel. Excruciatingly painful migraines are often a by-product. As her pain escalates, so do the killer's clues.

The Bone Woman
Clea Koff, 2005

To prosecute charges of genocide and crimes against humanity, one fact that must be established absolutely are the bodies: those of ordinary people rather than combatants. Forensic anthropologists must answer this question by proving precisely who the victims were and how they were killed. In 1996, Clea Koff, a 23-year-old graduate student, was sent to Rwanda by the U.N. to work with a small team exhuming victims of the genocide. *The Bone Woman* is a mesmerizing account of her four years of grueling investigations into these and other murderous events: what she found in the Rwandan hills and in Srebrenica, how it affected her, and who went to trial based on evidence she collected. Events which transformed her from an idealistic student to a war crimes veteran.
