Sustainable Macroeconomics, Climate Risks and Energy Transitions Unurjargal Nyambuu, Willi Semmler, 2023-05-30 Given the industrialized world s historical dependence on fossil fuel based energy resources and the now realized perils of moving beyond the earth s carbon budget this book explores the myriad challenges of climate change and in reaching a low carbon economy Reconciling the medium term competing yet frequently complementary needs for transition policies the book provides guidelines for complex and often conflicting climate policy tasks The book presents empirical trends in the use of carbon emitting resources and evaluates market driven short termism and its adverse impact on resource use and the environment it emphasizes a medium term macroeconomic perspective for the transition The authors attempt a paradigm shift towards a framework of sustainable macroeconomics They survey relevant historical models conduct empirical and numerical analyses of the climate change relevant dynamic models provide empirical illustrations and evaluate diverse policy options and implementations together with their historical evolution New analytical issues are also considered e g strategic behavior in the energy and resource sectors energy competition and the dynamics of market shares in new energy technology and supporting policies for dealing with the tipping points encountered in climate change The authors suggest a multitude of market based strategies and public fiscal monetary and financial policies and longer run planning for resource extraction all suitable for driving sustainable growth and a transformation of the energy sector The book also examines the multiple delaying forces slowing the transition to a low carbon economy these typically arise from short termism lock ins irreversibility leakages non cooperative games and other political strategies Thus they explain the snail s pace evolution of current national and global climate policies The book will appeal to scholars and students of economics and environmental science It is also relevant for policymakers and practitioners in multilateral institutions research institutions as well as governments and ministries of countries interested in alternative energy sources climate economists and those who study the implementation of sustainable and low carbon based policies

Foundations of Modern Macroeconomics Ben J. Heijdra, 2017-08-25 The study of macroeconomics can seem a daunting project The field is complex and sometimes poorly defined and there are a variety of competing approaches It is easy for the senior bachelor

and starting master student to get lost in the forest of macroeconomics and the mathematics it uses extensively Foundations of Modern Macroeconomics is a guide book for the interested and ambitious student Non partisan in its approach it deals with all the major topics summarising the important approaches and providing the reader with a coherent angle on all aspects of macroeconomic thought Each chapter deals with a separate area of macroeconomics and each contains a summary section of key points and a further reading list Using nothing more than undergraduate mathematical skills it takes the student from basic IS LM style macro models to the state of the art literature on Dynamic Stochastic General Equilibrium explaining the mathematical tricks used where they are first introduced Fully updated and substantially revised this third edition of Foundations of Modern Macroeconomics now includes brand new chapters covering highly topical subjects such as dynamic programming competitive risk sharing equilibria and the New Keynesian DSGE approach Study Guide for Use with Macroeconomics [by] J. Bradford DeLong Martha L. Olney, J. Bradford De Long, 2002 **Modern Macroeconomics** Brian Snowdon, Howard R. Vane, 2005 Erudite accessible and lucidly written this book is both a stimulating introduction and excellent guide to the controversies and diversity of modern macroeconomic debates It will prove invaluable for students on undergraduate and postgraduate courses who want to understand as well as simply learn about macroeconomics

Rational Expectations and Inflation Thomas J. Sargent, 2013-05-05 A fully expanded edition of the Nobel Prize winning economist s classic book This collection of essays uses the lens of rational expectations theory to examine how governments anticipate and plan for inflation and provides insight into the pioneering research for which Thomas Sargent was awarded the 2011 Nobel Prize in economics Rational expectations theory is based on the simple premise that people will use all the information available to them in making economic decisions yet applying the theory to macroeconomics and econometrics is technically demanding Here Sargent engages with practical problems in economics in a less formal noneconometric way demonstrating how rational expectations can satisfactorily interpret a range of historical and contemporary events He focuses on periods of actual or threatened depreciation in the value of a nation s currency Drawing on historical attempts to counter inflation from the French Revolution and the aftermath of World War I to the economic policies of Margaret Thatcher and Ronald Reagan Sargent finds that there is no purely monetary cure for inflation rather monetary and fiscal policies must be coordinated This fully expanded edition of Rational Expectations and Inflation includes Sargent s 2011 Nobel lecture United States Then Europe Now It also features new articles on the macroeconomics of the French Revolution and government budget deficits *Recent Developments in Macroeconomics* Edmund S. Phelps, 1991

On the Relationship Between Determinate and MSV Solutions in Linear RE Models Bennett T. McCallum, 2004 This paper considers the possibility that in linear rational expectations RE models all determinate uniquely non explosive solutions coincide with the minimum state variable MSV solution which is unique by construction In univariate specifications of the form $y_t = A E_t y_t + C y_{t-1} + u_t$ that result holds if a RE solution is unique and non explosive then it is the same as the

MSV solution Also this result holds for multivariate versions if the A and C matrices commute and a certain regularity condition holds More generally however there are models of this form that possess unique non explosive solutions that differ from their MSV solutions Examples are provided and a strategy for easily constructing others is outlined Economic Growth and Development Olivier La Grandville,2011-12-12 Since the very beginnings of economics as a science which might be dated from Ibn Khaldun s Introduction to History 1377 the challenge of making societies escape from poverty and attain some degree of prosperity has always been and can remain a fundamental issue This book presents research on each of these issues *Macro II* Edward Tower,1995 *The Elements and Dynamic Systems of Economic Growth and Trade Models* Bjarne S. Jensen,2025-04-15 This updated and expanded book examines the fundamentals of economic growth models as expressed by dynamic systems of nonlinear differential equations With homogeneous dynamic systems as the unifying mathematical framework the time paths and long run stability properties of the solutions to classical neoclassical and modern macroeconomic growth models are analyzed The general structure and solutions of two sector and multi sector growth models are also explored with special attention given to the evolution of output compositions and sectoral factor allocations involved in Walrasian general equilibrium dynamics Ramsey optimal growth saving models with variable intertemporal substitution non homothetic utility are discussed to demonstrate the ability to generate a realistic historically observed evolution of economic per capita growth rates and saving rates The book aims to highlight how basic economic growth models can be extended widely including international trading economies world market prices commodity trade patterns and issues related to globalization migrations and international factor movements It will be relevant to students and researchers interested in economic growth and trade policy Macroeconomics Norman C. Miller,1983 *Macroeconomics* Mankiw,John Fernald,Chariot,Jason Furman,1997-01-01 **Macroeconomics** Wendy Carlin,David Soskice,2006 This volume provides a unified framework for the analysis of short and medium run macroeconomics It develops a core New Keynesian macro model based on imperfect competition and nominal rigidities and shows how this compares with alternatives Modern Macroeconomics Geoffrey Woglom,1988 A new textbook in macroeconomics for a college level course The Cumulative Book Index ,1998 A world list of books in the English language **Macroeconomics, Monetary Economics and Money & Banking Course Materials** ,1981 **Principles of Macroeconomics** Pearson Learning Solutions, **Reflections on the Development of Modern Macroeconomics** Roger Backhouse,1997 This is a collection of essays on the development of modern macroeconomics It reflects the profound and controversial changes that the subject has undergone in the period 1974 to 1999 Each of the eight essays focuses on an important issue relating to those changes **Credibility and the Value of Information Transmission in a Model of Monetary Policy and Inflation** Tamer Başar,Mark Salmon,1990
