we hardly value the food we eat and the soil that it's grown in. How is it that we care so little how food production impacts animals and the environment? Industrial farming has transformed Britain's rural landscapes, increasing crop yields and reducing hunger. Yet this has all come at a terrible ecological cost. It is both a miracle and a disaster. **Six Inches of Soil**, the film and this companion book, is the inspiring story of three British farmers standing up to the industrial food system and transforming the way they produce food to heal the soil, benefit our health, and provide for local communities. **Six Inches of Soil** is a story of courage, vision, and hope. This book is not just for farmers. Reconnecting with our food and regenerating our soils ourselves and our communities benefits everyone and needs everyone to be involved. We want to inspire farmers with the confidence and practical know-how to adopt regenerative farming approaches. We want to give consumers the impetus and information to rethink their food choices. This book and the film are closely related but stand on their own. In these pages, you will find detailed chapters on each of the three farmers that provide replicable case studies and inspiration. Additionally, there are chapters examining the problems with the current agri-food system and proposing solutions and a vision for the future. Recognised experts explain agroecological farming systems and soil science, consider the issues of land use, greenwashing, subsidies, food security, and provide examples of agroforestry applications and farm enterprise stacking and diversification. Their three stories are inspiring, guiding, and frustrating. Allow yourself to be inspired, to be guided, and to turn your frustration into action.

5m Books **Memories from the Future** ATAO LAIS, 2019-08-07 Just as we plan a building before we actually build it, why wouldn't we, the owners of hearts, brains, computers, and internet connections, plan the future of humanity with the same mindfulness before it actually manifests in the present? This book is a wake-up call to join our efforts in designing our future according to our desires, best knowledge, and common sense. It's exactly the opposite of reading our fortune in the stars, anticipating apocalypse, waiting for the last judgment, or letting the rich and powerful do the planning and building on our and the planet's back. It's about choosing and building a new world that makes as much sense as possible for us and our children. Because meaning in life is paramount, more significant than survival.
