The Manna Machine George Sassoon, Rodney Dale, **Life Is a Noble Myth** Albert Amao S. Ph.D., 2026-02-11 This book highlights the transformative power of noble lies in driving the progress of human societies Noble lies are not just falsehoods but well crafted narratives that motivate human action and lay the foundation for future generations Therefore a noble lie in this work is defined as the systematic promotion of deception with good intention to achieve specific goals for the welfare of society in general Noble lies are inspiring and motivating forces that drive human progress They act as an evolutionary spark much of what inspires unites or propels us forward even if it isn't strictly true in a scientific sense visionary mythmakers craft them to give us meaning and energize human will They serve as inspiring models that encourage human behavior Meanwhile there are also harmful lies that can be exploited by ruling elites and social or religious leaders to control and manipulate society This work postulates that life can be understood as a noble lie that fosters the growth of human consciousness This perspective suggests that what we refer to as modern civilization is constructed on these noble lies mythic concepts ingrained in a virtual reality designed to challenge refine and expand our awareness These lies are not falsehoods in the conventional sense instead they serve as masks that conceal the processes of transformation Humans are inclined to create narratives that infuse our lives with meaning and purpose They aim to transcend the ordinary situation to improve living conditions Without these central myths humanity would be adrift and lacking direction and our journey towards modern civilization would be incomplete This highlights the vital role of noble lies in establishing a sense of order and direction in our complex societies

The Art of Deception is the Rule of Life Albert Amao Soria Ph.D., 2024-07-09 This book is a spiritual journey of self discovery for those open minded and willing to embrace the truth even if it means confronting deep rooted false beliefs inherited from our ancestors It is a call to step out of the comfort of blissful ignorance and into the light of personal enlightenment Ignoring the truth may provide temporary solace but it can lead to greater despair and fear in the long term This existential gap is usually filled with religions myths and legends however these stories may not be entirely factual Nevertheless they provide solace and a sense of purpose in life so they are often considered well intentioned pious fiction Many desire to know the truth but few are genuinely prepared to handle it This book challenges many core beliefs and convictions held as accurate it may lead to existential conflict As King Solomon wisely said For with much wisdom comes much sorrow the more knowledge the more grief Ecclesiastes 1:18 These words resonate with the essence of this book inviting you to embark on a journey of self discovery and truth seeking It highlights the transformative potential of this process as those who can confront the truth honestly undergo a psychological catharsis a liberation of erroneous assumptions Thus this book is not for the faint of heart More than 2 500 years ago Buddha stated that life is an illusion and today's most accurate science quantum physics asserts that we live in virtual reality The truth can challenge our deepest convictions and induce confusion because we live based on false assumptions imposed by our ancestors mass media outdated
