
The Motivation Letter for DAAD Scholarship (Development-Related Postgraduate Courses)

I am going to write my motivation letter for DAAD scholarship. This is to make some decision on me and why I want to apply for this scholarship. My name is Ms. Myo Tin Zar Lwin @ Shabana. I am from Myanmar (Burma). I am 24 years old and was a Postgraduate Coursework student from Yangon Technological University (YTU), studying under the Department of Architectural Engineering. And I finished my Postgraduate Coursework in Architecture at May, 2018. I already graduated a Dual Bachelor Degree Programme in Architecture (B.Arch) and Bachelor in Technology (B.Tech) from Technological University (Thanlyin). As I wanted to become an Urban Planner even though I cannot get any Certificates or Degrees about Urban Planning in my hometown, so what I had learned about Architecture, which makes me more concerning about Urban Planning. What else there is a guarantee for me to get a job and for what I wanted to become? I have become more interesting on the Urban Planning subject however the subject is a bit differ with Architecture, and moreover I have done some projects related with Urban Planning while I was studying Postgraduate Coursework Programme.

I have joined Internship Programme in a company named "Classical Architect" for 2 months. After I finished up my internship, the company hired me as a Part-Time Junior Architect at December, 2014. Once I was graduated, they promoted me as a Full-Time Architect. In that company, I have been responsible to work collaboratively with my colleagues in the production of architectural drawing and construction drawing including: site plans, floor plans, elevations, building sections, etc. in through all stages of a project. But I had to left my position from this company because I have got an acceptance to attend the Postgraduate Coursework of Architecture at Yangon Technological University (YTU). I made some volunteering since I was studying my Bachelor Degree Programme.

The first thing that I did was I joined university library for volunteering service when I did not need my time to study. So from that I have got some opportunities to learned about Architecture and Urban Planning. And another service is that I joined the Association of Myanmar Architects (AMA) and Myanmar Engineering Society (MES) since I got a Bachelor Degree. Once I had become a participant in these associations, they offered me a lot of workshops, seminars, forums and community service activities to attend and serves as a volunteer. It was a great experience for me to have opportunities like that. Through my participation as a volunteer in such activities, I have learned many valuable thoughts and ideas and I have known how to well-organized in these kinds of organizations. In the section of personality, I am always punctual and precise on whatever the task I took. I do like to take challenges and I never feel like to give

Convergence Analysis of Proximal-like Methods for Variational Inequalities and Fixed Point Problems Nils Langenberg, 2011 Several regularization methods for variational inequalities and fixed point problems are studied Known convergence results especially require some kind of monotonicity of the problem data as well as especially for Bregman function based algorithms some additional assumption known as the cutting plane property Unfortunately these assumptions may be considered as rather restrictive e g in the framework of Nash equilibrium problems This motivates the development of convergence results under weaker hypotheses which constitute the major subject of the present book Studied methods include the Bregman function based Proximal Point Algorithm BPPA Cohen s Auxiliary Problem Principle and an extragradient algorithm Moreover this work also contains the first numerical comparison of stopping criteria in the framework of the BPPA Although such conditions are the subject of theoretical investigations

frequently their numerical effectiveness and a deducible preference were still unknown This gives rise to the necessity of the presented numerical experiments
