1998 International Conference Software Engineering: Education & Practice Martin Purvis, Stephen

Cranefield, Steve MacDonell, 1998 *Sustainability and Megaproject Development* Franca Cantoni, Edoardo

Favari, 2022-07-08 Megaprojects also referred to in the literature as Large Engineering Projects or Major Projects are generally defined as large scale investment initiatives worth 1b or more and facing similar problems independent of the country where they are implemented and the industry they belong to The common feature of most megaprojects is that they are difficult to design and manage so that their realization and completion is always extremely expensive often over budget and delivery deadlines also are not met In the worst case scenario they remain unfinished This book through its multidisciplinary approach offers food for thought and alternative interpretations for the complex world of megaprojects While much research has been conducted and differing approaches have been developed over the last 20 years there is still a lot of debate surrounding the topic and a holistic approach for effectively managing these initiatives is still missing What is clear to all researchers and experts in the field is that a traditional linear management approach is simply not sufficient as at many stages of a megaproject iterative and feedback effect occurs due to stakeholder involvement and increasing and continuous interaction between them The book promotes the debate among all categories of stakeholders involved in the megaproject's supply chain in order to increase the awareness of complex phenomena relating to the critical issues and common problems they face all over the world and to seek performance improvement across the whole life cycle of a megaproject including the selection design construction operation and de commissioning The multidisciplinary approach cultivated in the book conveys an innovative way to study megaprojects and their inherent complexities **Becoming a**

Construction is desperate for good experienced skilled and dedicated supervisors and foremen Construction needs you Being a construction supervisor or foreman is challenging it s hard work but it s also rewarding watching projects take shape under your watch A supervisor s job is never boring every day is different each project is different different locations and different people all presenting new challenges A construction foreman foreperson or supervisor supervises a work crew or manages a section of work They re at the coalface of every construction project the critical link in the construction process Good foremen and supervisors are essential to the success of every construction project and every construction company indeed they re invaluable Yet few managers and supervisors are prepared to mentor and train the next generation of supervisors and foremen Most supervisors and foremen have years of experience on the tools learning their trade sometimes through apprenticeships but mostly learning from others These skills are focused on a particular trade or skill But being a supervisor is a different ballgame Where before as a trades person they were doing the work themselves now as supervisor they must organise and manage others doing the work I m a construction professional with 30 years of experience and the author of several acclaimed construction books including *Successful Construction Project Management The Practical Guide* and *Construction Management From Project Concept to Completion* As a young engineer and later as project manager I was

fortunate to learn from many excellent supervisors and foremen I wouldn't have achieved what I did without the foremen on my projects. They were the powerhouse on my construction projects and I only had to steer the project to a successful conclusion. Now it's my turn to share my 30 years of construction experience and knowledge with construction supervisors and foremen. To explain why things are done in a certain way, why good paperwork is essential, but more importantly to help supervisors and foremen become the very best.
