Proceedings of the 5th International Conference on AI Research Renata Paola Dameri, The International Conference on AI Research ICAIR is becoming a key forum for academics and students whether social scientists natural scientists or philosophers come together to explore the future of society in the context of AI Many aspects of AI are now the subject of peer reviewed academic research including the increasing use of Chatbots and GenAI in academe and in society at large The conference was initially launched in 2019 as the European Conference on Artificial Intelligence and Robotics After a success inaugural event in Oxford the conference fell victim to Covid and the following three years were held online Time was taken in 2023 to refocus this fast developing area

of research and the name of the conference was changed this year to the International Conference on Artificial Intelligence. The Proceedings of the 2025 edition of the conference include academic research papers, PhD research papers, Masters Research papers and work in progress papers, all of which have been presented and discussed at the ICAIR 2025 conference. The proceedings are of an academic level appropriate to a professional research audience including graduates, postgraduations, doctoral and post doctoral researchers. All papers have been double blind peer reviewed by members of the Review Committee.

Proceedings of the 7th Celt International Conference (CIC 2024) Ekawati Marhaenny Dukut, Antonius Suratno, Heny Hartono, Radhika Gajjala, M. Mary Jayanthi, Christopher D. Gabriel, Hazel P. Atilano, 2024-12-31. This is an open access book. The English language stands as a pivotal tool for fostering international dialogue, facilitating the acquisition of scientific and technological knowledge, propelling economic growth, and enabling participation in global competition. Its prestigious role in a myriad of domains has significantly elevated the importance of English Language Teaching (ELT). Among the emerging approaches in ELT, the integration of Artificial Intelligence (AI) particularly within the framework of Communicative Language Teaching (CLT) offers transformative potential. To harness the benefits of AI in ELT, substantial investments have been directed towards modernizing educational curricula, revising English syllabi to incorporate AI-driven principles and methodologies, developing communication-oriented textbooks, crafting skill-focused assessments, and enhancing educators' comprehension of novel language learning theories and pedagogies. This comprehensive approach aims to elevate the effectiveness of ELT by aligning it with contemporary technological advancements. However, the widespread endorsement of CLT and AI integration is not without its challenges. Despite the professed commitment of many educators to CLT, resistance persists across both Eastern and Western educational contexts. Cultural specialists and educators frequently debate the necessity, appropriateness, and efficacy of CLT and AI in language teaching. This ongoing debate underscores several constraints, including insufficient resources, limited instructional time, and a lack of linguistic and sociocultural competence among educators. Consequently, ELT pedagogies have evolved differently across various social, cultural, and economic environments, reflecting the diverse contexts in which they are implemented. The 7th Celt International Conference (CIC) aims to provide a critical platform for examining the complexities of integrating CLT and AI within the culturally nuanced landscapes of English Language Literature and Arts education. The conference will explore how deeply ingrained cultural expectations can conflict with the adoption of innovative teaching methodologies and how such resilience can be navigated to enhance the educational experience. We invite educators, policymakers, sociologists, cultural experts, business leaders, artists, and entrepreneurs to participate in the 2024 CIC Webinar. This event, themed "Cultural Resilience and the Emergence of AI in the Teaching and Learning of English Language Literature and Arts," will facilitate an exchange of experiences, ideas, and practices that address the intersection of tradition and innovation in the context of ELT. Your participation will contribute to a richer understanding of how to effectively integrate AI in language education while respecting and adapting to cultural

particularities Join us in this crucial dialogue and be part of shaping the future of English Language Literature and Arts education amidst the challenges and opportunities presented by AI and cultural resilience

Recent Research in Management, Accounting and Economics (RRMAE) Hafinaz, Hariharan R., R. Senthil Kumar, 2025-03-07 The conference brought together innovative academics and industrial experts to present novel contributions related to real world aspects of Economics Management and Accounting The primary goal of the conference was to promote research and developmental activities in these three fields Another goal was to promote scientific information interchange between researchers developers engineers students and practitioners working in and around the world
