is to answer the question What is the status quo regarding strategically implemented CSR in general and at SME s within the
German construction sector in particular and how should a model be designed that enables the practicability of CSR at these
SME s For this purpose the research areas are divided into a theoretical and a practical section In the theoretical part the
worldwide status quo on CSR is determined by means of a literature research Concrete results of this research arise in the
definition of key figures which can be selected on the basis of the SDG s by means of a benchmarking with Best in Class
Companies for SMEs The practical part of the dissertation addresses expert interviews in the context of qualitative analyses
the evaluation results of which are contributing to the derivation of measures for the strategic anchoring of CSR A
quantitative analysis is used to determine the status quo of CSR directly among a number of representative micro
entrepreneurs The result of the work conducted is an easy to implement model furthermore a typology and categorization of
the German CEOs of the SMEs studied is derived which enables a type specific implementation of this CSR model By
deducting the most important indicators for recording and managerial accounting non financial parameters of the German
construction industry and developing a standard reporting system according to the DNK a set of methods could be designed
that can be used by micro enterprises and which has proven its suitability in a practical test In a cost benefit calculation the
ROI of these investments made for the introduction and maintenance of CSR could be determined and thus confirming that a
rapid amortisation of these expenses can also be expected from a financial point of view Dhaka University Journal of
