Managing Business Process Flows Ravi Anupindi, 1999 *Managing Business Process Flows* is a concise textbook for MBA level operations management courses It provides a process flows approach to studying some of the core concepts in operations with three steps 1 Model and understand the process and its flows 2 Study causal relationships between process structure and certain performance metrics 3 Formulate implications for managerial actions by filtering out managerial levers process drivers MBPF shows how managers can control process structure and process drivers to achieve desired business process performance This book is the result of the combined insight and experience of five operations management professors at the Kellogg Graduate School of Management Northwestern University An educational version of Process Model is included with this textbook

Managing Business Process Flows Ravi Anupindi, Sunil Chopra, Sudhakar D. Deshmukh, Jan A. Van Mieghem, Eitan Zemel, 2013-08-28 For graduate level courses in Operations Management or Business Processes A structured data driven approach to understanding core operations management concepts Anupindi shows how managers can design and manage process structure and process drivers to improve the performance of any business process The third edition retains the

general process view paradigm while providing a sharper more streamlined presentation of the development of ideas in each chapter all of which are illustrated with contemporary examples from practice *Managing Business Complexity* Michael J. North, Charles M. Macal, 2007-03-01 Agent based modeling and simulation ABMS a way to simulate a large number of choices by individual actors is one of the most exciting practical developments in business modeling since the invention of relational databases It represents a new way to understand data and generate information that has never been available before a way for businesses to view the future and to understand and anticipate the likely effects of their decisions on their markets and industries It thus promises to have far reaching effects on the way that businesses in many areas use computers to support practical decision making *Managing Business Complexity* is the first complete business oriented agent based modeling and simulation resource It has three purposes first to teach readers how to think about ABMS that is about agents and their interactions second to teach readers how to explain the features and advantages of ABMS to other people and third to teach readers how to actually implement ABMS by building agent based simulations It is intended to be a complete ABMS resource accessible to readers who haven't had any previous experience in building agent based simulations or any other kinds of models for that matter It is also a collection of ABMS business applications resources all assembled in one place for the first time In short *Managing Business Complexity* addresses who needs ABMS and why where and when ABMS can be applied to the everyday business problems that surround us and how specifically to build these powerful agent based models
