Retail Market Study 2015 Marc-Christian Riebe , 2015-02-02 The Retail Market Study 2015 of The Location Group is the one and only study of its kind worldwide The focus of the Retail Bible are the 150 of the most notable international cities of the fashion and retail world and more than 3 000 store openings on 1 670 pages Over 1 300 retailers 800 shopping streets and 500 shopping centers were analyzed The study reached more than 250 000 readers worldwide so far The Report: Thailand 2016 Oxford Business Group, 2016-04-15 According to the UN Conference on Trade and Development Thailand has been among eight priority destinations for foreign investment since 2012 Factors weighing on growth in 2016 will include an ongoing economic slowdown weakening global demand for Thai exports and growing levels of consumer debt The government s investment promotion agenda while perhaps more complicated than in previous years also addresses the dual challenge of labour shortages and the middle income trap through promotion of both labour intensive and high tech industries while potential membership in two major trade blocs could see regional and international exports soar in the coming years Although the near term forecast is dampened by global volatility weakening demand and the impact of China s slowdown trade in Thailand will remain on an upwards trajectory in 2016 and investment though unlikely to meet government targets is nonetheless expected to bounce back from a challenging 2015 **EuroProperty** , 2010 **Urban**

Land , 2009 **Planning, Public Policy and Property Markets** David Adams, Craig Watkins, Michael White, 2008-04-15 The focus of this book is on how public policy and especially the planning system both shapes and reflects the essential characteristics of land and property markets It challenges the common misconceptions that property markets operate in isolation from public policy and that planning permission is the only significant form of state intervention in the market Planning Public Policy Property Markets contends that effective state market relations in land and property are critical to a prosperous economy and a robust democracy especially at a time when development aims to be sustainable and environmental protection needs to be matched by urban and rural regeneration The book thus reflects an increased realisation among academics and practitioners of the importance of theoretical integration and joined up policy making Its

rounded perspective addresses a significant weakness in the academic literature and will encourage broader debate and a more pluralist agenda for property research. Prominent contributors present important new research on different market sectors and policy arenas including regeneration and renewal housing growth housing planning transport and economic competitiveness while the editors specifically draw out more general lessons on the dynamic nature of the state property market relationship in a modern economy. This book will encourage all those involved in property research who strive for theoretical and practical connectivity to demonstrate that just as property market operations cannot be analysed without understanding state processes policy decisions cannot be taken without an appreciation of how the market operates.
