Modern Full Stack Development with Web Technologies Padugupati Penchalaiah, Suresh Babu Jugunta, V. Jyothsna, P. Bhasha, 2025-12-25 Web development has become one of the most essential and rapidly evolving domains in the field of computer science and information technology. With the increasing reliance on web-based applications across education, business, healthcare, and governance, a strong foundation in web technologies is indispensable for today's students and aspiring professionals. This textbook has been carefully designed to introduce learners to the fundamental concepts of web development in a structured and systematic manner. Beginning with the basics of web development and client-server architecture, the book provides a comprehensive understanding of HTML core elements, formatting techniques, forms, and tables, followed by an in-depth introduction to Cascading Style Sheets (CSS) for effective webpage styling and layout design. The content is presented in a simple, student-friendly language with numerous examples, step-by-step explanations, and practical illustrations. Emphasis has been placed on conceptual clarity as well as hands-on learning, enabling students to not only understand theoretical aspects but also develop real-world web pages with confidence. The organization of chapters closely follows standard university and technical education syllabi, making this book highly suitable for undergraduate and self-learning courses.
