01

Purposeful Sampling

- Intentionally selects participants based on criteria, it includes maximum variation, criterion, and extreme case sampling for specific insights or experiences.

02

Convenience Sampling

- Selects easily accessible participants. Useful in exploratory research or with limited resources, but may not represent the entire population.

03

Snowball Sampling

- Involves participants recruiting others through networks. Useful for hard-to-reach populations, with initial participants identifying additional subjects as research progresses.

04

Quota Sampling

- Selects participants based on predetermined characteristics to ensure subgroup representation. Useful for diverse perspectives, but data may not be generalizable.

05

Theoretical Sampling

- Selects participants based on emerging themes during analysis. Used in grounded theory, allowing sampling decisions to evolve with the research.
